

# Advanced Learning Plans and SMART Goals

# Gifted Student Learning and Growth

Ensured by needed provisions and advocacy.

The Reference Series are small packets of information regarding topics relevant to statewide improvements in gifted program designs or gifted student achievement. The Series is a quick way for implementers of gifted programming and the public to gain an initial understanding of the topic. Representatives of the gifted education directors' network select the topics based upon immediate need or legislation that requires a tutorial for building statewide understanding and implementation.

The overview of the gifted education topic will be described in terms of definition, description or characteristics, resources, assessments, common tips or evidence based practices in relation to the topic. Examples of methods or tools referenced in the series are not exclusive. If legislation is the topic, the purpose is to clarify the law and procedures for implementation. The authors encourage further study and application of the particular topic.

Gifted Student Learning and Growth

Ensured by needed provisions and advocacy.

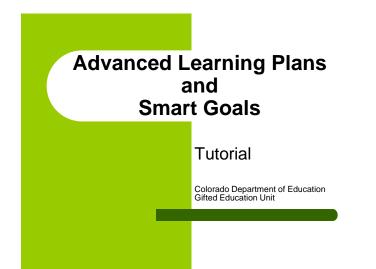

Development of the Reference Series is largely due to the volunteer efforts and expertise of gifted educators in Colorado. The following educators are recognized for their contributions to the Early Access packet and their dedication to ongoing improvements for gifted student education.

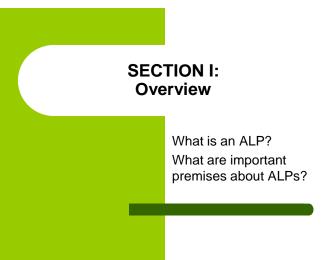

Michelle Arthur	Tanya Batzel
Cindi Beavers	Diane Cassidy
Carol Crossley	Susan Crow
Beth Gaffney	Tami Hogan
Karen Kendig	Wendy Leader
Ruthi Manning	Nikki Massieon
Jacquelin Medina	Melinda Ness
Debbie Rothenberg	Julia Watson
Laura Wedow	

Gifted Student Learning and Growth

Ensured by needed provisions and advocacy.

#### Definition

- ECEA statute: 22-20-103
- Rule Section 12.01 (2)

#### "Advanced Learning Plan" or "ALP"

means a written record of gifted and talented programming utilized with each gifted child and considered in educational planning and decision making.

#### **Exceptional Children's Education Act**

#### • 22-20-104.4

- ...A program plan adopted by an administrative unit pursuant to the section shall be consistent with the advanced learning plans of the gifted children who are identified by the administrative unit
- Over time, program plans will adjust according to the needs described in ALPs of students identified as gifted in the AU.

#### **Exceptional Children's Education Act**

- 22-20-104.4
  - ...A program plan adopted by an administrative unit pursuant to the section shall be consistent with the advanced learning plans of the gifted children who are identified by the administrative unit
- Over time, program plans will adjust according to the needs described in ALPs of students identified as gifted in the AU.

# Monitoring

- ALPs are dynamic, working documents developed and reviewed through collaborative efforts of the teacher/s, parents and student.
- The areas selected as priorities for SMART goals are monitored through ongoing assessment and parent-teacher conferences.
- ALPs are managed and monitored in the school and filed in the student's cumulative file.

# Monitoring

- ALPs are signed annually by parents, the child's teacher/s, the student (as appropriate) and other personnel involved in development.
- A clearly articulated transition process describes how ALPs are transferred from one level of schooling to the next.
- ALPs are reviewed during CDE's Continuous Improvement and Monitoring Process (CIMP).

### **ALP Elements**

- Student information
  - Strengths, interests
  - Achievement data
  - Affective needs
- Collaborative goal setting
  - Parents
  - StudentTeacher
  - Gifted Education Specialist- consultant
- Annual review

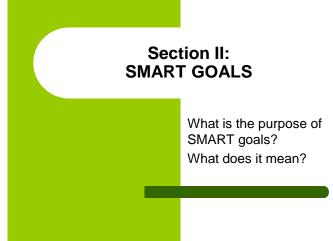

Integrated with ongoing systems in the school/district

#### **ALP Elements (continued)**

- Balanced programming All components are addressed over time
  - Differentiated instruction, curriculum and assessment
     Decisions about pace, depth and complexity
    - Determination of Tier I, II, or III interventions
  - Affective guidance
  - Content extensions
  - Structure for learning; placement

#### **ALP Elements (continued)**

- Data driven decisions
  - Current student information and annual review will present data that guides decisions for acceleration and other programming emphasis.
  - Achievement targets are annual primary obligations.
  - SMART goals describe the specific and measurable programming emphasis for annual learning and growth.

# **SMART Goals**

- We use SMART goals in the ALP to inspire students toward new levels of learning and growth.
- SMART goals provide clear instructional and affective guidance each year.
- SMART goals provide a measure of where we believe the student will progress as a result of programming.
- Results of SMART goals provide the student with an indicator of success, self-efficacy, and next steps.

# A Next Step

- Goal writing enhances the instructional decision making process.
- After writing a SMART goal, there needs to be thinking and implementation of *instructional strategies, rigorous curriculum and progress monitoring* that will be used to build/increase student knowledge, understanding, skills and application of the indicator being addressed.

# S = Specific

- Goals are specific. Prior to writing a goal think about the
  - Who, what, when, where, and how of the action or learning that is to be accomplished based upon student information.
- To be specific, a goal has a clear *INDICATOR* that will be emphasized for learning and growth.
- The indicator is a standard, used to determine what the student should know, understand, and do academically, personally, or affectively.

# **Examples of Indicators**

- Content standards
- Continuum of grade level benchmarks
- · Various habits of mind continuums
- Standards for college planning
- Behavioral standards and expectations for positive interactions

#### M = Measurable

- To be measurable, a goal has an action or expectation toward a higher level of performance.
- Measures are often stated by increases in: rate, percentage, number, level of benchmark, level of performance, rubric standards, juried level of standard, and accelerated content course grade.

#### A = Attainable

- To be attainable, a goal defines an indicator that is important and relevant.
- An attainable goal expands the match between student profile and programming in reasonable steps.
- Attainable goals inspire positive attitude, skill development, opportunities for developing self-esteem and breakdown barriers to learning.

#### R = Realistic

- To be realistic, a goal has a *TARGET* or endpoint for guiding annual learning and growth.
- A target is a prediction of where the student will be, or how far the student will learn and grow.
- A target demonstrates growth in the standards of the INDICATOR.
- Realistic long term targets for gifted students in the area of strength is two years or more.

### T = Timely and Tangible

- To be timely, a goal has a time frame for accomplishing the measurable target or measuring the growth expected in the specific continuum of indicators identified in the goal statement.
- To be tangible, a goal is dynamic. Ongoing progress monitoring provides data for making pace, content and skill decisions for adjusting the learning experience toward the goal.

#### Section III: Developing SMART Goals

Where do you start? What needs to be in a SMART goal? Student examples Writing SMART goals using the worksheet template.

#### Where do you start?

- Start with data data data
  - Initially, the student profile provides baseline data for setting academic and affective goals, programming options and placement.
  - What are the strengths of the student
  - What indicators are most relevant?

# **Annual reviews**

 Thereafter, the annual review starts with a discussion of current student information, effectiveness of programming interventions and options and student results that lead to adjusted decisions about goals, options and placement.

### **Example Data: Student Profile**

Science	Elementary School
Gender: Female	Age: 10
Grade: 4 <sup>th</sup> grade	Current Placement: 2 year GT Program
	dvanced, Reading = high proficient, trict assessment = 98%, NWEA spring
of 3rd grade science score in gifted r	
9	
9	ange re 132, nonverbal 122, composite 126 ons: Perfectionist, non risk taker,
Aptitude: CogAT verbal 118, quantitativ Behavioral traits/ Affective Consideration	ange re 132, nonverbal 122, composite 126 mar: Perfectionist, non risk taker, racted, moderate motivation

# SMART Goal Example

• SMART Goal for Learning and Growth:

By May, this student will successfully complete a mentorship with a veterinarian as measured by the mentorship rubric, a classroom presentation of investigation (with product) with a rubric score average of 3 out of 4, and compete at the County Fair with her product in June as documented by entrance paperwork.

#### **SMART Goal Example**

#### SMART Goal for Affective Growth

There will be a reduction in perfectionist tendencies/behaviors/anxieties between now and May as measured through parent/teacher observations along with a reduction over time in student requests for assistance with this behavior as recorded in calendar log by adults.

#### Implementation

- SMART Goals are linked to specific instructional strategies.
- What instructional strategies will you use with this student profile to ensure successful completion of the goal?

### **Example Data: Student Profile**

	STUDENT PROFILE			
Reading/Language Arts High School				
Gender: Male	Age: 14			
Grade: 10 <sup>th</sup> grade	Current Placement: 8 years GT Programming advanced reading/writing, now in 10 <sup>th</sup> grade Honors English			
Achievement Data: ACT - Re	eading = 26, Writing = 26, Science = 26, Math = 17			
Aptitude: Ravens- 99+				
Behavioral traits/Affective Considerations: Leadership capabilities, wants to fit in, has worked through underachievement, is charming, took a risk by playing sports and did well, can do anything well, not keeping up with his ability in math, needs to push himself in ways that would be beneficial to learning, feels he is different from anyone else, could use a memtor for career planning and focus, needs to be encouraged to explore options i.e. military and academics				
Parental and other environmental factors: Young mother, has a step father, supportive, not college graduates, low-mid SES				

# **SMART Goal Example**

• SMART Goal for Learning and Growth

By May, Student A, will demonstrate advanced level skills in Reading, evidenced by Advanced scores in Reading CSAP and other district level assessments and obtain at least a "B" grade in Honors English.

## **SMART Goal Example**

- SMART Goal for Affective Growth
  - By May, Student A will have studied and reflected upon 3 Habits of the Mind as measured through journaling and interviews; and set and achieved 3 related personal goals to be measured through self-evaluation, parent and teacher observations and interviews. A three-year career goal has been set for Student A to be monitored by the school counselor.

  - By the end of 10th grade Student A will complete an interest inventory, volunteer 2 hours a month in an area of interest, and visit one college that offers a degree in one area of interest
     By the end of first semester 11th grade Student A will complete a vocational aptitude test; volunteer, find an internship or work at least 1 hour a week in an area of interest and vocational aptitude; visit 2 colleges that offer a degree in one or more areas of his vocational aptitude and interest. By the end of second semester 11th grade Student A will have completed essays and applications to 3 colleges.
     By the end of 12th orado Student A will ave completed as a set of a second set of the end of second second second set of the end of second se
  - By the end of 12th grade Student A will complete a personality test, visit three job sites in his area of interest and aptitude that are atypical careers and complete a one semester paid or unpaid internship in his area of interest.

# Implementation

- SMART Goals are linked to specific instructional strategies.
- What instructional strategies will you use with this student profile to ensure successful completion of the goal?

# Application

- What does this mean to your students?
  - Review Student Data
  - Write content and affective SMART Goals
  - Choose specific instructional strategies to ensure success

#### Section IV: Management of ALPs

In what ways are ALPs filed? Who manages ALPs? How do people get together for discussing ALPs? In what ways do ALPs engage parents and students?

# Filing ALPs

- A living, dynamic document for parent-teacher conferencing and monitoring
- A document for cumulative files that is adjusted at least annually
- Dependent upon local system for maintaining student files
  - Infinite Campus
  - Alpine
  - Folders

# **Managing ALPs**

 The local area determines who will assist the classroom teacher in managing the cyclical process of ALP development, monitoring and review

#### • Examples

- Counselor and grade level teacher
- Building gifted liaison and classroom teacher
- Assistant principal and cluster teacher
- Gifted Education Specialist
- Peer consultant (another teacher in the building)

# **Collaborative ALP Discussions**

- Formal identification assessment
- Problem solving team approach
- Standard protocol discussions with ALP team
- Parent-teacher conferences
- Progress monitoring adjustment

# **Engaging parents and students**

- · Initiated when clues of exceptionality are recognized
- Input regarding activities, behaviors and interests outside school
- Collaborative partners in making programming and other intervention decisions
- Shared responsibility for ALP
- · Feedback on academic and affective progress
- Input on personal preferences for learning, study habits, and organization; for college planning
