LEGISLATIVE COUNCIL

Report To The

GOVERNOR'S COMMITTEE
on
ADMINISTRATIVE ORGANIZATION

INDEX
of

LAWS RELATING TO ORGANIZATION OF STATE GOVERNMENT

Research Publication No. 6

1954

Purpose of the Index

In order to equip it with a graphic presentation which would readily demonstrate any overlapping of function, inconsistencies in nomenclature and undesirable administrative patterns, the Legislative Council was directed by the Governor's Committee on Administrative Organization to prepare a chart showing the organization of state government on a functional basis. Such a chart has been prepared for the Committee and is now available to others, although in a limited supply, upon request. In order to further assist the Governor's Committee in its study of state government administration, there was prepared a list of the legal citations relating to the numerous offices, boards, and agencies appearing on the organizational chart. Thus, this listing takes the reader directly from the chart into the law authorizing each activity shown thereon and he can become more specifically informed regarding said activity. This index of laws, then, is intended as a supplement to the functional organizational chart of Colorado State Government.

Acknowledgement

The preparation of the functional organizational chart was a task of considerable magnitude due to the fact that it is the first time in many years that Colorado State Government has been portrayed in this manner. Much credit is due to the Bureau of State and Community Service, University of Colorado, the Bureau Director, William Grelle, and Bureau Consultant, Dr. Leo C. Riethmayer for their assistance in supervising graduate students Paul Clark and Donald L. Polard in the preparation of the organizational chart and the index. Without the long hours devoted to this task by these men such a chart and index would not now be available. In addition sincere appreciation is extended to the Colorado Planning Commission Director, W. W. Williams and Commission draftsman Douglas Kuwano for the time, patience and effort devoted to expertly putting the chart in condition for reproduction.
