# Cash Funds Uncommitted Reserves Report 

## Authority, Purpose, and Scope

This audit was conducted under the authority of Section 24-30-207, C.R.S., which requires the State Auditor to audit the Cash Funds Uncommitted Reserves Report. We conducted the audit in accordance with generally accepted auditing standards. The audit was performed during the period August 1998 through January 1999.

The Office of State Planning and Budgeting prescribed the format for the Cash Funds Uncommitted Reserves Report as prepared by the State Controller. The Report is included in the Financial Information section of this audit report.

## Background

Senate Bill 98-194 was signed into law on June 1, 1998, to:
... assure compliance with the limitation on state fiscal year spending and to make fundamental fiscal policy decisions establishing the level of activity of all departments and agencies of state government, including those funded by revenues generated from fees.

To accomplish this objective, Senate Bill 98-194 established a limit on the amount of reserves that may be maintained in cash funds. Generally, the reserve limit is equal to 16.5 percent of the total expenditures in the cash fund during the fiscal year. In some cases, an alternative reserve balance is established elsewhere by statute. If either statutory limit is exceeded, agencies are required to reduce fees accordingly.

## The Effect on TABOR Revenues

Senate Bill 98-194 creates a mechanism to assist the State in complying with the limitations on fiscal year spending that are established by Article X. Section 20, of the Colorado Constitution (TABOR). Because the total of both general fund revenues and revenues received from cash-funded activities are limited by TABOR, any increases in fees for cash-funded services may cause the State to exceed the revenue limits established by TABOR. Therefore, Senate Bill 98-194 attempts to control the amount of fees charged by cash-funded programs.

Cash fund revenues made up about $\$ 2.1$ billion, or 28 percent of the $\$ 7.4$ billion TABOR revenues received in Fiscal Year 1998. However, not all cash fund revenues are affected by Senate Bill 98-194. For example, the Act specifically excludes certain cash funds (e.g., the Highway Users Tax Fund). Exclusions like this total about $\$ 1.3$ billion, making only about $\$ 782$ million in cash fund revenues subject to the provisions of Senate Bill 98-194. The Act further excludes all cash funds with uncommitted reserves less than $\$ 50,000$. This exclusion reduces the total revenues subject to Senate Bill $98-194$ compliance to about $\$ 282$ million, or about 3.8 percent of total TABOR revenues.

When TABOR revenues exceed the revenue limitation, the excess is required to be refunded to the taxpayer unless voters approve a revenue change as an offset. However, if an increase in revenue from cash-funded activities causes the State to exceed the revenue limits established by TABOR, the refund of excess revenues is not required to be paid from the cash funds that caused the excess. For example, for Fiscal Year 1997, revenues collected in excess of the TABOR limitation were refunded entirely from the General Fund, not from cash funds.

## Methodology to Identify Cash Funds With Excess Uncommitted Reserves

Senate Bill 98-194 prescribes a methodology to determine the amount of excess uncommitted reserves for each of the State's cash funds. The following hypothetical example of a cash fund illustrates the methodology. Fund balance (adjusted for exempt assets and previously appropriated amounts) and revenues (categorized by fee and non-fee sources) are used to derive the amount of excess uncommitted reserves. For Fiscal Year 19XX, Cash Fund X had the following activity and account balances:

| Hypothetical Balances for Cash Fund X |  |
| :--- | :--- |
| Balances as of June 30, 19XX |  |
| Ending Fund balance | $\$ 35$ |
| Exempt assets as defined by SB 98-194 (e.g., inventory) | $\$ 2$ |
| Previously appropriated fund balance (e.g., capital construction) | $\$ 3$ |
| Fiscal Year 19XX Revenues and Expenses | $\$ 100$ |
| Fee revenues | $\$ 50$ |
| Non-fee revenues | $\$ 150$ |
| Total revenues | $\$ 100$ |
| Total expenses |  |

Three steps are used to calculate the amount of excess uncommitted reserves:

1. Calculate the uncommitted reserve - First, the fund balance is reduced by exempt assets and any previously appropriated fund balance. (\$35-\$2-\$3 $=\$ 30$ ). Next, the reduced fund balance is multiplied by the ratio of fee revenues to total revenues $(\$ 30 \times(\$ 100 / \$ 150)=\$ 20)$. The result is the amount of uncommitted reserve for Cash Fund X . This amount represents the portion of the fund balance that is attributable to fee revenues.
2. Calculate the target reserve - Total expenses are multiplied by 16.5 percent. $(\$ 100 \times 16.5 \%=\$ 16.50)$. The result is the amount of the target reserve for Cash Fund X. For some cash funds the target reserve is specified by statute (e.g., the Low-Income Telephone Assistance Fund's target reserve is $\$ 250,000$ ).
3. Calculate the excess uncommitted reserve-The target reserve is subtracted from the uncommitted reserve $(\$ 20-\$ 16.50=\$ 3.50)$. If the amount is greater than zero, this is the excess uncommitted reserves.

Therefore, Cash Fund $X$ has an excess uncommitted reserve of $\$ 3.50$ at the end of Fiscal Year 19XX.

## Cash Funds With Excess Uncommitted Reserves

The Cash Funds Uncommitted Reserves Report shows that 69 cash funds had excess uncommitted reserves of about $\$ 34$ million as of June 30, 1998. In other words, 69 funds have been identified as having excess available funds. The following table shows the ten cash funds with the largest excess uncommitted reserves balances. These funds represent 70 percent of the total excess uncommitted reserves as of June 30, 1998.

| State | Secretary of State Fees | 4,073,300 |
| Natural <br> Resources | Wildlife | 3,718,006 |
| Law | Uniform Consumer Credit Code | 2,245,059 |

|  | Total | \$24,037,849 |
| Source: Cash Funds Uncommitted Reserves Report for the Fiscal Year Ended June 30, 1998. |  |  |

For the funds with excess uncommitted reserves, Senate Bill 98-194 requires the fees supporting the cash- funded activity to be reduced so that the uncommitted reserve balance falls below the target reserve. The time the agency has to reduce fees varies depending on the amount of excess uncommitted reserves. Specifically:

- If the uncommitted reserves are greater than the target reserve but less than 50 percent of the Fiscal Year 1998 fund expenditures, fees must be reduced so that the uncommitted reserve balance falls below the target reserve by the end of Fiscal Year 2001 (within three years).
- If the uncommitted reserves are greater than the target reserve but more than 50 percent of the Fiscal Year 1998 fund expenditures, fees must be reduced so that the uncommitted reserve falls below the target reserve by the end of Fiscal Year 2003 (within five years).

## Reporting Format

The law requires the State Controller to prepare an annual report for the purpose of ascertaining the amount of uncommitted reserves for each cash fund. The Cash Funds Uncommitted Reserves Report was created to meet this requirement. The Report must be delivered to the Office of State Planning and Budgeting and the Joint Budget Committee by September 20 each year.

We have compiled the following summary of the Cash Funds Uncommitted Reserves Report. The summary includes only those cash funds with excess uncommitted reserves.

# Findings and Recommendations 

During our audit we found inconsistencies in the way the Cash Funds Uncommitted Reserves Report was compiled and the way the excess uncommitted reserves were calculated. Following are recommendations to improve the usefulness of the report.

## Method Used to Calculate Excess Uncommitted Reserves Is Inconsistent

Senate Bill 98-194 provides various definitions of terms that are applicable to the determination of allowable cash fund reserves (e.g., what is meant by cash fund, fees, target reserve, and uncommitted reserves). Using these definitions, the State Controller's Office developed a methodology to calculate the amount of excess uncommitted reserves for each cash fund.

## Non-Fee Transactions Are Excluded to Determine the Uncommitted Reserve but Not the Target Reserve

Many cash funds receive revenue from non-fee sources as well as from fees. To focus solely on revenue generated from fees, the General Assembly required that non-fee revenue be excluded from calculations of the cash fund's uncommitted reserve. However, the law does not similarly exclude non-fee expenses in calculating the target reserve. Therefore, the target reserve includes expenses from both fee and non-fee sources. This results in the target reserve being higher than if the matching portion of non-fee expenses were excluded. Consequently, the uncommitted reserve and the target reserve are not calculated using the same components, because non-fee activities are taken out of one (i.e., the uncommitted reserve) but not the other (i.e., the target reserve).

The effect of including non-fee expenses in the target reserve is to understate excess uncommitted reserves in those cash funds that have non-fee revenues. The following table shows a hypothetical example to illustrate this.

| Example of the Impact of Excluding Non-Fee Expenses When Calculating the Target Reserve |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Method | Fund Balance | Fee <br> Revenue - $\qquad$ <br> Total <br> Revenue | Fee <br> Expenses $\qquad$ <br> Total Expenses | Uncommitted Reserve <br> (Fund balance $x$ (fee revenue/total revenue)) | Target Reserve | Excess <br> Reserve |
| Current | \$100,000 | $\begin{aligned} & \$ 120,000 \\ & \hdashline \$ 300,000 \end{aligned}$ | Not Considered ------------- | \$40,000 | $\begin{gathered} \$ 46,200 \\ (16.5 \% \text { of } \\ \text { total } \\ \text { expenses }) \end{gathered}$ | \$0 |
| Proposed | \$100,000 | $\begin{gathered} \$ 120,000 \\ \hline \$ 300,-000 \end{gathered}$ | $\begin{gathered} \$ 112,000 \\ \hdashline \$ 280,000 \end{gathered}$ | \$40,000 | $\begin{gathered} \$ 18,480 \\ (16.5 \% \text { of } \\ \text { fee } \\ \text { expenses }) \end{gathered}$ | \$21,520 |
| Difference | \$0 | \$0 | Fee expenses determined \& used in calculation | \$0 | \$(27,720) | \$21,520 |

Source: Office of the State Auditor analysis.

In the example above, excluding non-fee expenses resulted in a $\$ 21,520$ increase in excess reserves. If non-fee expenses were excluded from the calculation of target reserves for all cash funds with uncommitted reserves greater than $\$ 50,000$, the excess uncommitted reserves would increase by over $\$ 8$ million. This would increase the total number of funds with excess uncommitted reserves from 69 to 81. Most of this increase takes place in various higher education cash funds (increase of about $\$ 5$ million) and the Wildlife Cash Fund (increase of about $\$ 2.2$ million). It should be noted that non-fee expenditures are generally not reported separately in the accounting system. Consequently, we estimated the amount of non-fee expenses based on the percentage of non-fee revenue to total revenue.

## Compensated Absence Liabilities Are Handled Differently Among Cash Funds

Generally accepted accounting principles require the recording of a liability for compensated absences. A compensated absence liability represents amounts owed to current employees for accumulated annual and sick leave.

In most cases general government agencies record their liability for compensated absences in a separate account group (i.e., the General Long-Term Debt Account Group) rather than in their operating cash funds. Higher education institutions, however, do record this liability in their operating funds. In both cases the liability is recorded in accordance with generally accepted accounting principles. This difference, however, causes an inconsistency when calculating excess uncommitted reserves. Specifically, because higher education institutions record their liability in their operating cash funds, their fund balance is lowered. Having a lower fund balance will eliminate or reduce the amount of any excess uncommitted reserve that may exist. The following table contains a hypothetical example showing the effect of excluding the compensated absence liability from the uncommitted reserve. (Note: The following example assumes no other changes in methodology.)

Senate Bill 98-194 already contains a provision that excludes long-term assets credited to a cash fund from the calculation used to determine uncommitted reserve. The General Assembly should also consider whether compensated absence liabilities should be excluded from the uncommitted reserve because of their long-term nature and the fact that they generally do not affect annual operations. Compensated absence liability represents a long-term obligation that would be owed to all employees if an entity ceased operations. Compensated absences are normally paid to only those employees who retire or leave an organization during the year. Therefore, compensated absence payments are normally made from annual operating revenues and do not require changes in fees.

## Cash Funds That Receive Federal Funds Have Inappropriately Lower Uncommitted Cash Reserves

Some cash funds receive revenue from federal sources (e.g., Department of Natural Resources, Division of Wildlife Fund). For purposes of Senate Bill 98-194, federal funds are considered non-fee revenue. Consequently, when calculating the amount of uncommitted reserves in those funds that have federal revenues, the fund balance is reduced based on the portion of federal revenue to total revenue.

Although federal revenue is non-fee revenue, we believe it should not be used to reduce uncommitted reserves. This is because most state-administered federal programs are cost reimbursement programs. This means that for every dollar the State spends on the program, the federal government will reimburse it a dollar. Therefore, there is no effect on fund balance, because total revenue received from the federal government equals total expenses for the federal program.

Because fund balance is being reduced by the ratio of non-fee revenue (which could include federal revenue) to total revenue, the amount of uncommitted reserve resulting from fee revenue is lowered. A cash fund that has federal revenue will have the benefit of a lower uncommitted reserve than a cash fund that does not have federal revenue. The following table contains a hypothetical example showing the effect of excluding federal funds when calculating the uncommitted reserve. (Note: The following example assumes no other changes in methodology.)

| Example of the Impact of Excluding Federal Funds When Calculating Uncommitted Reserves |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

We believe that federal revenue should not be used to reduce uncommitted reserves. Rather, federal revenue and federal expenses should be deducted from a cash fund's total revenue and total expenses for purposes of Senate Bill 98-194 calculations. This would provide a more consistent measure of uncommitted reserves among the State's cash funds and a more accurate measure of the amount of fund balance that is attributable to fee revenue.

## The State Controller's Office Should Seek Clarification of Cash Reserves Legislation

The intent of Senate Bill 98-194 is to ensure compliance with limitations on state spending and make fiscal policy decisions on revenues generated from fees. The Act's mechanism for doing this is to limit cash fund reserves to a specified level and
require reductions of fees if excess reserves are accumulated. The inconsistencies in the methodology discussed above affect the calculation of excess cash reserves and the corresponding requirement to reduce fees. We believe the State Controller's Office should work with the General Assembly to propose changes that clarify the cash reserve legislation in the above areas.

We modified the Cash Funds Uncommitted Reserves Report (see Appendix C) to illustrate the combined effects of:

- Eliminating non-fee expenditures from total expenditures in calculating the target reserve.
- Excluding the compensated absence liability for all cash funds.
- Excluding federal revenue from the calculation of uncommitted reserves.

For cash funds with uncommitted reserves greater than $\$ 50,000$, the result of these changes increased the amount of excess uncommitted reserves by over $\$ 10$ million. These changes also increased the total number of funds with excess uncommitted reserves from 69 to 83 . Of these three modifications, eliminating non-fee expenses from total expenses had the largest effect on excess uncommitted reserves. The following table shows the ten cash funds most affected by these changes and the dollar amount of the changes.

## Recommendation No. 1:

The State Controller's Office should work with the General Assembly to propose statutory changes to:
a. Exclude non-fee expenditures from total expenditures in calculating the target reserve.
b. Exclude compensated absence liabilities from the uncommitted reserves for all cash funds.
c. Exclude federal revenues and expenses from a cash fund's total revenues and total expenses.

## State Controller's Office Response:

Agree. The State Controller's Office will provide technical assistance to the Joint Budget Committee regarding the findings and recommendations. This will be accomplished by May 15, 1999.

## Interdepartmental Transactions Should Be Excluded From Higher Education Revenue and Expenditures

The total revenue and total expenses reported on the Cash Funds Uncommitted Reserves Report for all higher education institutions are both about $\$ 168$ million greater than the amounts on the State's central accounting system (Colorado Financial Reporting System, or COFRS). The reason for the difference is the way that the State Controller's Office reports certain financial transactions in expense accounts for purposes of Senate Bill 98-194. Transactions representing decreases of expenses (i.e., credit entries to expense accounts) are reported as revenue rather than as reductions of expenditures. These financial transactions generally represent interdepartmental and interfund transactions (i.e., financial transactions that occur between departments and funds within a college or university). Examples of such transactions include internal unit sales (i.e., sales of one department to another department within the college or university) and allocations of certain costs recorded in one fund to other funds (e.g., employee benefit costs, general and administrative costs).

Higher education agencies record interdepartmental transactions on the accounting system as reductions of expenditures so that they can be eliminated (i.e., not counted twice) for financial reporting purposes. However, reporting interdepartmental transactions within the same fund group as revenue inflates both the revenue and expenditures of higher education cash funds. It inflates revenue because the revenue was earned from internal rather than external customers. It inflates expenditures because the cost of the sales transaction is counted twice (i.e., once by the selling department and once by the buying department).

Because revenue and expenditure amounts are used in determining a cash fund's uncommitted reserve and target reserve, including interdepartmental transactions within the same fund group distorts the determination of excess uncommitted reserves. The following table contains a hypothetical example to illustrate this distortion. (Note: The following example assumes no other changes in methodology.)

| Example of the Impact of Excluding Interdepartmental Transactions Within the Same Fund Group From Higher Education Revenue and Expenses |  |  |  |  |  |  |

We attempted to estimate the effect of including interdepartmental transactions in the calculation of excess uncommitted reserves for all higher education cash funds. For purposes of Senate Bill 98-194, it is appropriate to include interdepantmental transactions between different fund groups but not transactions within the same fund group. Our estimate was limited by the fact that there is not sufficient information on COFRS to identify whether the intemal transactions occurred within the same fund group or between different fund groups. Such information, if available, would need to be obtained from colleges and universities to determine the actual impact of such transactions on the higher education cash funds reported in the Cash Funds Uncommitted Reserves Report. Assuming that all interdepartmental transactions occurred within the same fund group, we estimated that the excess uncommitted
reserves for all higher education cash funds could have been up to $\$ 8$ million higher if such transactions were excluded.

## Recommendation No. 2:

The State Controller's Office should obtain information on interdepartmental transactions from higher education institutions and revise its Cash Funds Uncommitted Reserves Report methodology to exclude such transactions within the same fund group.

## State Controller's Office Response:

Agree. This information is not available from the statewide accounting system. Our office will examine the feasibility of having the colleges and universities provide this information. We will also consider the option of not adjusting the system balances for these offsets. To be implemented July 30, 1999.

## Higher Education Cash Funds Appear to Be Reasonably Defined

Senate Bill 98-194 defines a cash fund to be any fund (other than the General Fund or any federal fund) established by law for a specific program or purpose. For higher education institutions, statutes generally create one fund for the deposit of monies to the State Treasury and payment of operating expenses for each higher education Governing Board.

For purposes of Senate Bill 98-194, the State Controller's Office did not use the statutory definition of a cash fund when compiling information on the higher education institutions. Instead, the State Controller's Office, with input from higher education representatives, defined the cash funds based on the accounting structure of the funds in COFRS. For example, there is a fund group that accounts for educational and instructional activities, which includes state-appropriated general funds as well as tuition and fees. Another group accounts for auxiliary and selfsupporting activities (e.g., student housing, food services, student housing), and one fund group accounts for funds restricted by donors or other outside agencies (e.g., federal and private grants and contracts). The reporting of cash funds by fund group on the Cash Funds Uncommitted Reserves Report is consistent for each institution or campus.

Although Senate Bill 98-194 provides a general definition of a cash fund, the definition is not applicable to higher education institutions. This is because higher education institutions do not have specific cash funds established by law for a specific program or purpose as do general government agencies.

Using different definitions of cash funds could affect whether cash funds have excess uncommitted cash reserves that would require a reduction in fees. We believe the approach currently used is reasonable because it groups activities by purpose or function (e.g., instruction and education, support activities) and generally enables financial information to be obtained in the manner reported on the central accounting system.

## Financial Information

STATE OF COLORADO
OFFICE OF THE STATE AUDITOR

Members of the Legislative Audit Committee:
We have performed the procedures enumerated below on the Cash Funds Uncommitted Reserves Report of the State of Colorado for the Fiscal Year Ended June 30, 1998. The accompanying Cash Funds Uncommitted Reserves Report is the responsibility of the State Controller's Office and was prepared for the purpose of monitoring compliance with Section 24-75-402, C.R.S. Our engagement was conducted pursuant to Section 24-30-207, C.R.S., in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included such procedures as we considered necessary.

Our procedures and findings are as follows:

1. For the State's colleges and universities, we agreed the fund balance and fee revenue to the State's central accounting records without exception. However, the total revenue and total expense for higher education cash funds reported on the Cash Funds Uncommitted Reserves Report are both $\$ 168,219,924$ higher than the State's central accounting records. See our findings and recommendations for further description of the differences. The fund balance, exempt assets, fee revenue, total revenue, and total expense for all other agencies agreed to the State's central accounting records without exception.
2. We agreed the previously appropriated fund balance to the statutory appropriation without exception.
3. We recalculated the non-fee fund balance, the uncommitted reserve, the target reserve, and the excess uncommitted reserve without exception.
4. We compared the alternative reserve with the amount specified in statutes without exception.
5. We compared the types of accounts used to compile the amount of exempt assets and fee revenue with their statutory definitions without exception.
6. We compared each cash fund with its enabling statute. All cash funds were created by statute with the exception of the funds in the State's colleges and universities. See our discussion of higher education cash funds.

The objective of our engagement was not to express an opinion, and accordingly, we do not express such an opinion. Had we performed additional procedures sufficient to express an opinion, other matters might have come to our attention that would have been reported.

This repont is intended solely for the information and use of the Joint Budget Committee of the General Assembly and the Office of State Planning and Budgeting and should not be used for any other purposes. However, this report is a matter of public record and its distribution is not limited.

## NOTES TO CASH FUNDS UNCOMMITTED RESERVES REPORT

## NOTE 1. PURPOSE

Section 24-30-207, Colorado Revised Statutes, requires the State Controller to prepare a report showing the amount of uncommitted reserves credited to each of the State of Colorado's cash funds. This report is prepared in accordance with the statutory definitions and may not agree to financial reports prepared on a GAAP basis. The report must be audited by the State Auditor. The report is to be delivered to the Office of State Planning and Budgeting and to the Joint Budget Committee on or before September 20 of each year.

## NOTE 2. CASH FUND DEFINED

Section 24-75-402 (2) (b), Colorado Revised Statutes, defines "cash fund" to mean any fund, other than the state general fund and any federal fund, established by law for a specific program or purpose.

The balances of each fund are generally reported at the fund and agency level except that certain higher education funds have been combined to more accurately reflect the activity in those funds.

## NOTE 3. CASH TUNDS EXCLUDED

The following cash funds are specifically excluded from the cash reserves report:

- Any cash fund for which revenues are derived solely from fees, the amounts of which are established by the federal govermment;
- Any cash fund for which revenues are derived solely from fees set by the Colorado Supreme Court in the exercise of its exclusive authority to regulate the practice of law;
- Any cash fund for which revenues are derived solely from fees set by an enterprise, as defined in Section 24-77-102 (3), Colorado Revised Statutes, or a special purpose authority;
- Any cash fund that is established for capital construction;
- Any cash fund for which the reserve amounts are based on actuarial requirements;
- Any trust funds;
- Any cash fund with uncommitted reserves of less than $\$ 50,000$;
- The Petroleum Storage Tank Fund;
- The Hazardous Substance Response Fund;
- The Land and Water Management Fund;
- The Brand Inspection Fund;
- The Colorado State Fair Authority Cash Fund;
- The Highway Users' Tax Fund; and
- The State Highway Fund.

## NOTE 4. TUND BALANCE

Fund balance is the net of total assets and total liabilities in each fund as of June 30, 1998.

## NOTE 5. EXEMPT ASSETS

Exempt assets are any long-term assets or non-monetary current assets held by the fund at lune 30, 1998. "Non-monetary" current assets are those that either cannot be converted to cash or are held with the intent of being used rather than converted to cash, including but not limited to consumable inventory and prepaid expenses.

# NOTES TO CASH FUNDS UNCOMMITTED RESERVES REPORT 

## NOTE 6. PREVIOUSLY <br> APPROPRIATED <br> FUND BALANCE

Previously appropriated fund balance is that portion of fund balance that has been appropriated for capital construction or other multi-year purposes.

## NOTE 7. FEE REVENUE

Fee revenue means any moneys collected by an entity, except that fee revenue does not include:

- Any moneys collected from sources excluded from state fiscal year spending, as defined in Section 24-77-102 (17), Colorado Revised Statutes;
- Any moneys received through the imposition of penalties or fines or surcharges imposed on any person convicted of a crime;
- Any moneys received through the imposition of taxes;
- Any moneys received from charges or assessments, the amount of which are not determined by the entity;
- Any moneys received from gifts or donations;
- Any moneys received from local government grants or contracts;
- Any moneys received through direct transfers from another entity, enterprise, or a special purpose authority; or
- Any moneys received as interest or other investment income.

## NOTE 8. NON-FEE <br> FUND BALANCE

Non-fee fund balance is calculated by subtracting any exempt assets and previously appropriated fund balance from total fund balance and multiplying the result times the ratio of non-fee revenue to total revenue.

## NOTE9. UNCOMMITTED RESERVE

Uncommitted reserve is calculated by subtracting any exempt assets and previously appropriated fund balance from total fund balance and multiplying the result by the ratio of fee revenue to total revenue.

## NOTE 10. TARGET/ALTERNATE RESERVE

Target reserve is defined as 16.5 percent of Fiscal Year 1998 expenditures. In some cases, an alternate reserve is used when there is a reserve limit established by statute.

## NOTE 11. EXCESS UNCOMMITTED RESERVE

Excess uncommitted reserve is the amount by which the uncommitted reserve exceeds the targetalternate reserve.
