## PREFACE

In order to make a thorough list of publications of the research and instructional staff of Colorado State College during the first fifty years of scientific production, it was necessary to get a fairly thorough list of persons who had at one time been connected with this institution.

This list, a by-product of the search for publications by the faculty, was made up from the catalogs of the institution to which was added such information as was found in other sources available in the library. Since it was made up from the catalogs, it cannot, of course, be complete nor entirely accurate as to dates of titles. But since it did put a considerable amount of information in one place, it was thought desirable to make several copies for reference use.

This particular work was done under the direction of Miss Laura I. Makepeace, Technical Librarian. Detail work was done by Miss Josephine Lambe as part of her duties as a N. Y. A. student.
