Introduction

Welcome to the Division of Water Resources' Cumulative Yearly Statistics for 2001. This publication provides our customers with yearly data of surface water use and ground water well application and permitting activity. We hope you find this publication useful.

This data is collected from the Division Engineer's Annual Reports and represents the seven major water basins in the state. The publication takes yearly stream delivery data, as collected by our division offices and presents it in two different formats. Yearly tabular data is provided for the water years 1997 through 2001. Selections of this data are also provided to you in a graphical format, providing a viewer friendly way to look at recent trends in water deliveries. The same presentation is made for ground water well permitting activities of the Division from July 1, 1996 through June 1, 2001. Subsequent publications will include the updates for the most recent completed years.

Included in this report are statistics on the number of well permit applications received by county and the major uses for the year 2001, and the number of completed wells by county and the primary uses through December 31, 2001.
