Introduction

Welcome to the Division of Water Resources' (DWR) Cumulative Yearly Statistics for 2003. This publication provides our customers with yearly data of surface water use, as well as ground water well applications and permitting activity. We hope you find this publication useful.

This data is collected from the Division Engineers' annual reports and it represents the seven major river basins in the state. The publication takes yearly stream delivery data, as collected by our division offices, and presents it in two different formats. Yearly tabular data is provided for the water years 1999 through 2003. Selections of this data are also provided in a graphical format, providing a viewer-friendly way to observe recent trends in water deliveries and ground water well permitting activities of the DWR from 1999 through 2003.

Included in this report are statistics on the number of well permit applications received by county and the major uses for the year 2003, and the number of completed wells by county and the primary uses through December 31, 2003.

These totals are subject to revision as data is updated and data retrieval techniques are refined.

A change in data retrieval criteria regarding Monitoring and "Other" uses caused a reduction in the numbers reported in previous years.

Well uses such as fire protection, exchange, recreation and wildlife are now reported in the "Other" category.
