Introduction

Welcome to the Division of Water Resources' (DWR) Cumulative Yearly Statistics for 2007. This publication provides yearly data of surface water use, as well as ground water well applications and permitting activity.

This data is collected from the Division Engineers' annual reports and it represents the seven major river basins in the state. The publication takes yearly stream delivery data, as collected by our division offices, and presents it in two different formats. Yearly tabular data is provided for irrigation years 2003 through 2007. Selections of this data are also provided in a graphical format, providing a viewer-friendly way to observe recent trends in water deliveries and ground water well permitting activities of the DWR from 2003 through 2007.

Included in this report are statistics on the number of well permit applications received by county and the major uses for the year 2007, and the number of completed wells by county and the primary uses through December 31, 2007.

Marta Ahrens, Public Information Officer
Colorado Division of Water Resources
