

Insulin Pen Safety

60 Second Check

Check the following 6 steps:

A simple **60 second safety check** can prevent unintended errors which place residents at risk of acquiring bloodborne pathogen infections such as hepatitis B, hepatitis C, and HIV.

Please take time to check your steps.

1

- The pen is used for only one resident, even if the needle is changed between use. *Insulin pens should never be used for more than one person.*

2

- Resident's full name is on the barrel of the insulin pen, not just the cap.

3

- Pens with missing, detached, excessively soiled or damaged labels are immediately destroyed or returned to the pharmacy for disposal.

4

- Medication is not expired.

5

- Verify that you are delivering the right pen, to the right resident, at the right time.

6

- Medications should not be stored with disinfectants, insecticides, bleaches, household cleaning solutions, poisons, body fluids or food.
- Medications should be stored in separate compartmentalized packages, containers or shelves to prevent intermingling of medications.

BE AWARE
DON'T SHARE

**ONE INSULIN PEN,
ONLY ONE PERSON**
