## Overview

The first administration of the Colorado English Language Acquisition Assessments (CELApro) occurred in spring 2006. At that time, the assessments were identical to CTB's *LAS Links*® Form A, except for customized Colorado test book covers and answer sheets.

*LAS Links* (Form A) continues to provide a solid foundation for all the CELApro tests. The *LAS Links* assessments were developed from a framework that reflects sound principles of second-language acquisition (Schmidt 2001; Savignon 1997, 1972; Bachman and Palmer 1996; O'Malley and Valdez Pierce 1996; Chamot and O'Malley 1994; Bachman 1990). Each *LAS Links* test consists of four separately scored sections (Speaking, Listening, Reading, and Writing). In addition to these four component scores, all of the Listening and Speaking items are combined to produce an Oral score, and selected Reading and Listening items are combined to yield a Comprehension score.

Approximately 30,000 students participated in the field test, item analysis, and calibration of *LAS Links* (Form A), which was calibrated and scaled using item response theory and a common-item equating design to place all grade levels on a common scale and to ensure that skill area scores have the same meaning across forms, grades, and years.

The *LAS Links* tests are aligned to CTB/McGraw-Hill's English Language Proficiency Assessment Standards (ELPAS), which were developed to include key standards from the national ESL and TESOL standards and from several state ESL standards. In order to match the Colorado standards, the five *LAS Links* grade spans were modified and reduced to four grade spans for the 2007 CELApro tests. In 2008, the K–2 grade span was divided into three separate grade spans, resulting in the current six CELApro grade spans: K, 1, 2, 3–5, 6–8, and 9–12. Additional items were added in 2008 to the Reading section in Grades K, 1, and 2 and to the Listening and Writing sections in all six grade spans. Table 1 shows a comparison of grade spans by year.

Table 1. Comparison of *LAS Links* and CELApro Grade Spans

Grade Spans		
LAS Links	CELApro 2007	CELApro 2008–2011
K–1	K–2	K
		1
		2
2–3	3–5	3–5
4–5		6–8
6–8	6–8	6–8
9–12	9–12	9–12

The 2011 CELApro tests are identical to those administered in 2008, 2009, and 2010. K, 1, 2, and 3–5 have a scannable book; the other grade spans have a reusable test book and a scannable answer book. The Speaking items and the Writing constructed-response (CR) items appear only in the answer sheet for the upper two grade spans.

## Part 1: Standards

The Colorado English Language Acquisition Assessment (CELApro) is the language proficiency assessment used for classifying and monitoring the progress of Colorado English Language Learners (ELLs) in the acquisition of English. *LAS Links* (Form A) assessments form the core of the CELApro tests.

The CELApro assessment measures the competencies necessary for successful social and academic language use in four major modalities—Listening, Speaking, Reading, and Writing—along a continuum of five proficiency levels: Beginning, Early Intermediate, Intermediate, Proficient, and Advanced. The assessment takes into account the students' maturation and cognitive skills by providing age-appropriate tests covering six grade spans: K, 1, 2, 3–5, 6–8, and 9–12.

A combination of item types—constructed-response (CR) and multiple-choice (MC) items—provide a variety of ways for students to demonstrate proficiency and to maintain reasonable testing times. Constructed-response items assess the productive domains of Speaking and Writing, whereas the multiple-choice items assess the receptive domains of Listening, Reading, and Writing (grammar). The variety of item types ensures measurement of the full spectrum of possible tasks required for each language subskill and allows for the interpretation of the results in multiple ways.

### Alignment Studies

An important indicator of the validity of a standardized test is the degree of *alignment* (i.e., the match) between the state English language development (ELD) standards and the test content. In developing standardized tests, test items are written to cover as many standards as possible.

Colorado has four general standards for English language learners, organized by modality (Listening, Speaking, Reading, and Writing) and applicable at all grade levels. The standards specify general skills in social and academic language.

- **Standard 1:** English Language Learners listen for information and understanding, using a variety of sources, for academic and social purposes.
- **Standard 2:** English Language Learners speak to convey information and understanding, using a variety of sources, for academic and social purposes.
- **Standard 3:** English Language Learners read for information and understanding, using a variety of sources, for academic and social purposes.
- **Standard 4:** English Language Learners write to convey information and understanding, using a variety of sources, for academic and social purposes.

A detailed description of the standards, by grade and proficiency level, is provided in Appendix F.

In order to increase the alignment of CELApro to the Colorado ELD standards, additional test items were written for the 2008 tests to assess individual standards that were not already assessed by *LAS Links* items.

CTB conducted an alignment analysis of the 2008 CELApro assessments to evaluate the match between the test and the standards. In performing an alignment, it is sometimes necessary to eliminate some standards because they cannot be easily assessed by a standardized test. For example, a standard may require an extended process outside of the test situation, as in the steps for writing a research paper, or it may specify instructional strategies rather than student skills, or it may specify parameters outside of the testing situation, such as “participate in group discussions.” Of the 397 Colorado ELD standards, 104 were eliminated as nonassessable. In performing the CELApro alignment, the raters independently matched items to all of the assessable standards on the basis of direct, indirect, or partial alignment. The test item numbers were then entered into the cells of the matching standards. The degree of alignment was calculated by totalling the number of assessable standards that were measured by at least one CELApro item. All of the standards are assessed by at least one test item.

This alignment was reviewed by CTB and the Colorado Department of Education (CDE) at a meeting in April 2007. CTB then conducted a final review with a committee of English Language Acquisition experts finalizing the alignment shown in Table 2. This table also reflects the current alignment, because the CELApro tests were unchanged from 2008 to 2011.

Table 2. Item Alignment Percentages by Grade Span

	<b>K–2</b>		<b>3–5</b>		<b>6–8</b>		<b>9–12</b>	
<b>Listening</b>	14/14	100	15/15	100	14/14	100	15/15	100
<b>Beginning</b>	4/4		5/5		5/5		5/5	
<b>Intermediate</b>	5/5		5/5		5/5		5/5	
<b>Advanced</b>	5/5		5/5		4/4		5/5	
<b>Speaking</b>	14/14	100	13/13	100	12/12	100	11/11	100
<b>Beginning</b>	4/4		4/4		5/5		4/4	
<b>Intermediate</b>	5/5		4/4		4/4		4/4	
<b>Advanced</b>	5/5		5/5		3/3		3/3	
<b>Reading</b>	16/16	100	15/15	100	14/14	100	12/12	100
<b>Beginning</b>	5/5		4/4		3/3		3/3	
<b>Intermediate</b>	7/7		6/6		5/5		5/5	
<b>Advanced</b>	4/4		5/5		6/6		4/4	

Table 2. Item Alignment Percentages by Grade Span (continued)

	<b>K-2</b>		<b>3-5</b>		<b>6-8</b>		<b>9-12</b>	
<b>Writing</b>	13/13	100	14/14	100	9/9	100	7/7	100
<b>Beginning</b>	2/2		4/4		3/3		2/2	
<b>Intermediate</b>	5/5		5/5		3/3		3/3	
<b>Advanced</b>	6/6		5/5		3/3		2/2	

## Part 2: Test Development

The 2011 CELApro tests are identical to the 2008, 2009, and 2010 tests and consist of both *LAS Links* items and items owned by the Colorado Department of Education. For the two higher grade spans (Grades 6–8 and 9–12), the organization of the CELApro tests are identical to the corresponding *LAS Links* assessments. The reconfigured tests for the two lower grade spans (Grades K–2 and 3–5) were created using selected items from the *LAS Links* assessments for the appropriate grades. The lowest grade span was also broken out into separate tests for Kindergarten, Grade 1, and Grade 2. All K–2 students take the same Listening and Speaking items but some different Reading and Writing items. All of these items were written by writers with experience or training in the areas being tested. Before writing items, all writers went through extensive training and were instructed to:

- Study each standard to be assessed.
- Decide what is important for the student to know and do to demonstrate mastery of the standard. Avoid the trivial.
- Write the item so that it focuses on the particular content or skill to be assessed.
- Develop answer choices that relate logically to the stem and standard. The correct response should be clear to students who have mastered the concept or skill. The distractors should be clearly wrong to students who have mastered the content or skill. Test items should not be “tricky” or contain information unfamiliar to most students.
- Provide documentation from source material (e.g., photocopies of encyclopedia entries and other reliable reference materials) to verify that all information included in the stimulus and item is correct. All factual statements in stimuli, stems, and correct responses must be checked against reliable sources. Distractors also should be verified as incorrect.
- Use appropriate subject matter. Refrain from explicit references to or descriptions of alcohol or drug abuse, sex, or vulgar language. Exercise caution when developing religious, political, social, or philosophical issues as subject matter. Individual beliefs should not influence content.
- Avoid using very controversial material. Large-scale (national, state, or district) assessments are administered to student populations with different experiences and beliefs.
- Verify that the item is free of content that could be offensive, insensitive, stereotypical, or that introduces other types of bias.
- Check that the content of the stimulus and/or the item is developmentally and age appropriate for the students being tested.
- Write a range of items representing all levels of proficiency in English within a specific standard.

The tests have been structured to comprehensively assess the four language skills of Speaking, Listening, Reading, and Writing. Comprehension is assessed using selected Listening and Reading items. A combination of constructed-response, dichotomous constructed-response (correct or incorrect), and multiple-choice items is used to provide diverse opportunities for students to demonstrate proficiency and to maintain reasonable testing times. Constructed-response items are used to assess the productive domains of Speaking and Writing, whereas the multiple-choice items are used to assess the receptive domains of Listening and Reading, and the Writing Use Conventions subtest. The structure of the 2011 CELApro is shown in Table 3.

Table 3. 2011 CELApro Test Structure

Content	Grade Span	Sub-Content	Item Type	Items	Score Points	CR/DCR Items Scored By	Administration	
<b>Speaking</b> 20 items, 41 pts	4 grade spans: K-2, 3-5, 6-8, 9-12	Speak Words	DCR	10	10	Local Test Administrator	Individual	
		Sentences	CR	5	15			
		Conversation	CR	4	12			
		Tell a Story	CR	1	4			
<b>Listening</b> K=21 items, 20 pts* 1-2=21 items, 21 pts 3-12=23 items, 23 pts	K	Listen for Information	MC	11	11	Not Applicable	Individual/Group	
		Listen in the Classroom	MC	5	5			
		Listen & Comprehend	MC	4	4			
	1-2	Listen for Information	MC	11	11			
		Listen in the Classroom	MC	6	6			
		Listen & Comprehend	MC	4	4

	6-12	Listening and Reading	MC	50	50			

KEY: DCR=Dichotomous CR; SCR=Short CR; ECR=Extended CR

\*There were 21 items in the Kindergarten Listening test, but one item was suppressed prior to scoring.

### **Item Review and Test Fairness**

All items are expected to be fair for all examinees. Various procedures are employed to review item bias. Once the items are developed, they must go through a series of content and bias reviews and analyses prior to being selected as part of the item pool. A content and bias review has two purposes: to ensure that the items are grade-level appropriate and to ensure that any sensitivity issues are identified and addressed. Grade-level appropriateness is evaluated by grade-level teachers who possess the on-the-ground knowledge of how content is taught in the classroom. Sensitivity reviews ensure that items are free of offensive, disturbing, or inappropriate language or content.

Content reviews and sensitivity and bias reviews were conducted on all operational items. The item review committees reviewed all operational items before the operational test administration.

### **Item Selection**

In selecting items for the reconfigured CELApro tests in Grades K–2 and 3–5, the primary criterion was to meet the content specifications represented by test blueprints, while at the same time maintaining the desired statistical properties of *LAS Links*. This involved an iterative process in which test characteristic curves and standard errors were examined after each preliminary item selection. Selections were revised as necessary in order to obtain an acceptable match to the statistical properties of the previous *LAS Links* assessments at each grade level.

### **Minimizing Test Bias**

The position of CTB/McGraw-Hill concerning test bias is based on two general propositions. First, students may differ in their background knowledge, cognitive and academic skills, language, attitudes, and values. To the degree that these differences are large, no one curriculum and no one set of instructional materials will be equally suitable for all. Therefore, no one test will be equally appropriate for all. Furthermore, it is difficult to specify what amount of difference can be called large and to determine how these differences will affect the outcome of a particular test.

Second, schools have been assigned the tasks of developing certain basic cognitive skills and supporting English language proficiency among all students. Therefore, there is a need for ELP tests that measure the common skills and bodies of knowledge that are common to English language learners. The test publisher's task is to develop assessments that measure English language proficiency without introducing extraneous or construct-irrelevant elements in the performances on which the measurement is based. If these tests require that students have culture-specific knowledge and skills not taught in school, differences in performance among students can occur because of differences in student background and out-of-school learning. Such tests are measuring different things for different groups and can be called biased (Camilli and Shepard 1994; Green 1975). In order to lessen this bias, CTB/McGraw-Hill strives to minimize the role of the extraneous elements, thereby increasing the number of students for whom the test is appropriate. Careful attention is given during the test construction process to lessen the influence of these elements for large numbers of students. Unfortunately, in some cases these elements may continue to play a substantial role.

Four measures were taken to minimize bias in the *LAS Links* assessments. The first was based

on the premise that careful editorial attention to validity is an essential step in keeping bias to a minimum. Bias can occur only if the test is measuring different things for different groups. If the test entails irrelevant skills or knowledge, however common, the possibility of bias is increased. Thus, careful attention was given to content validity during the item-writing and item-selection process.

The second way bias was minimized was by following the McGraw-Hill guidelines designed to reduce or eliminate bias. Item writers were directed to the following published guidelines: *Guidelines for Bias-Free Publishing* (MacMillan/McGraw-Hill, 1993a) and *Reflecting Diversity: Multicultural Guidelines for Educational Publishing Professionals* (Macmillan/McGraw-Hill, 1993b). Developers reviewed *LAS Links* assessment materials with these considerations in mind. Such internal editorial reviews were conducted by at least four different people: a content editor, who directly supervised the item writers; the project director; a style editor; and a proofreader. The final test built from the tryout materials was again reviewed by at least these same people.

In the third effort to minimize bias, educational community professionals who represent various ethnic groups reviewed all *LAS Links* tryout materials. They were asked to consider and comment on the appropriateness of language, subject matter, and representation of groups of people.

It is believed that these three procedures both improve the quality of an assessment and reduce item and test bias. However, current evidence suggests that expertise in this area is no substitute for data. Reviewers are often wrong about which items perform differently between specific subgroups of students, apparently because some of their ideas about how students will react to items may be inaccurate (Camilli and Shepard 1994; Sandoval and Mille 1979; Scheuneman 1984). Thus, a fourth method for minimizing bias, an empirical approach, was also used to identify potential sources of item bias. For language tests, these are differential item functioning (DIF) studies, since criterion-related validities are essentially unobtainable for such tests. DIF studies include a systematic item analysis to determine whether examinees with the same underlying level of ability have the same probability of getting the item correct. Items identified with DIF are then examined to determine whether item performance differences between identifiable subgroups of the population are due to extraneous or construct-irrelevant information making the items unfairly difficult. The inclusion of these items is minimized in the test development process. DIF studies have been routinely done for all major test batteries published by CTB/McGraw-Hill after 1970. Differential item functioning of the *LAS Links* assessment tryout items was assessed for students identified as males and females at each grade level in which the items were administered. In most cases, each item was administered at two grade spans.

Because *LAS Links* was built using item response theory, DIF analyses that capitalized on the information and item statistics provided by this theory were implemented. There are several IRT-based DIF procedures, including those that assess the equality of item parameters across groups (Lord 1980) and those that assess area differences between item characteristic curves (Linn, Levine, Hastings, and Wardrop 1981; Camilli and Shepard 1994). However, these procedures require a minimum of 800 to 1,000 cases in each group of comparison to produce reliable and consistent results. In contrast, the Linn-Harnisch procedure (Linn and Harnisch 1981) utilizes the information provided by the three-parameter IRT model but requires fewer cases. This was the procedure used to complete the gender DIF studies for the *LAS Links* field test data.

### Part 3: Tested Population

A total of 100,070 students participated in the 2011 CELApro testing. Students in Kindergarten and Grade 1 formed the largest groups of examinees (13,105 and 12,846 respectively), with numbers generally decreasing at successive grade levels. The number of male examinees was slightly greater than the number of females at each grade level. The examinee counts by grade and gender are shown in Table 4. Note that not all students completed all four of the CELApro content areas, so these numbers differ from those that appear in some of the subsequent tables within this report.

Table 4. Examinee Counts by Grade and Gender

Grade	Number of Examinees			Total
	Females	Males	Not Specified	
Kindergarten	6360	6745	0	13105
1	6176	6670	0	12846
2	5985	6343	0	12328
3	5530	5963	0	11493
4	4834	5217	0	10051
5	4203	4496	1	8700
6	3042	3583	1	6626
7	2703	3069	0	5772
8	2166	2566	1	4733
9	1980	2396	0	4376
10	1717	2169	1	3887
11	1426	1650	1	3077
12	1439	1637	0	3076
Total	47561	52504	5	100070

Student ethnicity, race, and home language are summarized by grade span in Tables 5 through 8. It should be noted that the results for ethnicity and race are not strictly comparable to those from prior years because the procedure for collecting and reporting this information was changed in 2011. Instead of obtaining this information from a single ethnicity variable as was done in the past, the information was collected using a two-part question. The first part is an ethnicity variable, classifying students as Hispanic/Latino or non-Hispanic/non-Latino. The second part is a race variable, which allows for the classification of each student into one or more racial groups. The responses to these two parts are then combined to place each student into one and only one of seven distinct Federal Reporting Categories. Students who are identified in the first part as Hispanic/Latino are classified as Hispanic/Latino. Students who are identified as non-Hispanic/non-Latino are classified into the six remaining categories on the basis of the race information indicated in the second part of the question. The resulting percentages of students in the new Federal Reporting Categories are very similar to the percentages that resulted from the prior years' single-variable classification. Table 5 shows the distribution of students in the new Federal Reporting Categories. Tables 6 and 7 summarize the responses to the two-part question about ethnicity and race. Table 6 shows the numbers and percentages of students whose ethnicity was identified as Hispanic or Latino and non-

Hispanic/non-Latino. Table 7 shows the numbers and percentages of students in each racial group.

Table 5. Examinee Counts and Percents by Federal Ethnicity Reporting Category and Grade Span

Ethnicity	Grade Span							
	Grades K–2		Grades 3–5		Grades 6–8		Grades 9–12	
	N	%	N	%	N	%	N	%
Hispanic or Latino	32071	32.05	26005	25.99	14860	14.85	11736	11.73

Table 7. Examinee Counts and Percents for Racial Classifications by Grade Span and Reported Hispanic/Latino Ethnicity\*.

Racial Classifications	Ethnicity: Hispanic/Latino							
	Grades K-2 (N=32071)		Grades 3-5 (N=26005)		Grades 6-8 (N=14860)		Grades 9-12 (N=11736)	
	N	%	N	%	N	%	N	%
American Indian/Alaska Native	8184	25.52	6958	26.76	3784	25.46	3279	27.94
Asian	131	0.41	74	0.28	44	0.30	37	0.32
Black/ African American	183	0.57	151	0.58	65	0.44	71	0.60
White	24075	75.07	19220	73.91	11201	75.38	8661	73.80
Native Hawaiian or Other Pacific Islander	197	0.61	140	0.54	53	0.36	51	0.43

Racial Classifications	Ethnicity: Not Hispanic/Latino							
	Grades K-2 (N=6207)		Grades 3-5 (N=4237)		Grades 6-8 (N=2270)		Grades 9-12 (N=2680)	
	N	%	N	%	N	%	N	%
American Indian/Alaska Native	170	2.74	168	3.97	95	4.19	88	3.28
Asian	2979	47.99	2045	48.27	1077	47.44	1355	50.56
Black/ African American	1160	18.69	778	18.36	482	21.23	667	24.89
White	1983	31.95	1297	30.61	609	26.83	545	20.34
Native Hawaiian or Other Pacific Islander	123	1.98	83	1.96	63	2.78	65	2.43

\*The percentages in Table 7 sum to more than 100% because some students were identified as belonging to more than one racial group. This table does not include students for whom Hispanic/Non-Hispanic ethnicity information was missing.

Table 8 shows the distribution of students by home language. As in previous years, the home language was indicated as Spanish for the overwhelming majority of students (approximately 85% in grades K-2, 87% in grades 3-5 and 6-8, and 82% in grades 9-12).

Because some students required accommodations in order to access the items, the following accommodations were available:

- Braille
- Large Print
- Use of a Scribe to Record Responses
- Signing
- Use of Assistive Communicative Devices
- Use of Approved Nonstandard Accommodations
- Oral Presentation

These accommodations are summarized, by content area and grade, in Tables 9 to 12.

## Part 4: Test Administration

The Colorado English Language Assessment was first administered in spring 2006. In 2007 the administration was moved to winter, and the CELApro was administered to 100,070 students in January 2011. This test consists of four separately administered sections assessing Speaking, Listening, Reading, and Writing proficiency.

The CELApro Speaking section is individually administered. The Listening, Reading, and Writing sections may be group administered or individually administered, depending upon the needs of the particular examinees being tested.

CELApro test examiners must be proficient English speakers who are able to model clear pronunciation of English phonemes. For group-administered K–2 Reading and Writing sections, students must be grouped by grade. For all of the group-administered sections, students in Grades 3 and above may be grouped either by grade or by grade span. Examiners are also instructed to group students by English proficiency in different rooms or at different times, if possible.

All sections of the test are untimed in order to give students every opportunity to demonstrate their proficiency in English. The estimated administration times and administration modes are shown in Table 13. Actual times may vary.

Table 13. Estimated Administration Time and Administration Mode by Skill Area

Skill Area	Estimated Administration Time (all tests are untimed)	Administration Mode
Speaking	10 Minutes – All Grades	Individual
Listening	20 Minutes – All Grades	Group or Individual
Reading	35 Minutes – Kindergarten 45 Minutes – Grades 1–12	Group or Individual
Writing	35 Minutes – Grades K–1 45 Minutes – Grades 2–12	Group or Individual

All test examiners, school assessment coordinators (SACs), and district assessment coordinators (DACs) were instructed in standardized test administration and scoring procedures prior to the test administration.

### The Speaking Subtests

The Speaking test is individually administered by a fluent English speaker who reads the test questions aloud while pointing to illustrations. All items are in constructed-response format, scored with performance-based rubrics that direct the attention of the rater (generally the examiner) to the student's use of vocabulary, social and academic language, complex grammatically correct verbal expressions, and length of responses. The Speaking test takes approximately 10 minutes per student to administer and consists of four subtests as follows:

***Speak in Words***

In *Speak in Words*, the examiner points to objects depicted in cue pictures and asks questions such as “What is this?” and “What is it used for?” Students respond with single words and short phrases to identify the objects and answer questions related to those objects. Student responses are scored as correct (C), incorrect (I), or no response (NR).

***Speak in Sentences***

In *Speak in Sentences*, students respond in complete sentences to describe activities or actions. The examiner points to each cue picture and directs the student to respond to prompts such as “Tell me what is happening in the picture,” “Tell me exactly where the book is located,” and “Please give me clear directions on how to go from Place A to Place B.” Student responses are scored with a 0–3 rubric.

***Make Conversation***

Students also respond in complete sentences in *Make Conversation*. However, instead of describing pictures, students respond to the examiner’s prompts such as “Tell someone to do something,” “Ask someone for something,” “Describe how to do something,” and “Explain why we do something.” Student responses are scored with a 0–3 rubric.

***Tell a Story***

In *Tell a Story*, students produce multiple sentences explaining what is happening in a series of four pictures. The pictures illustrate a story with a beginning, a middle, and an end. Pointing to the series of four pictures, the examiner begins the story by reading a story starter to contextualize the pictures without giving away vocabulary or key content. Student responses are scored on a 0–4 rubric.

### **The Listening Subtests**

The Listening test is administered to a group of students by a proficient English speaker who reads from the Examiner’s Guide and uses the audio CD. All Listening items are in multiple-choice format and measure general comprehension and inferential and critical thinking skills at a discourse level that integrates academic language. Students listen to classroom English to demonstrate language proficiency levels within each grade span. The Listening test takes approximately 20 minutes per group to administer and consists of three subtests: *Listen for Information*, *Listen in the Classroom*, and *Listen and Comprehend*.

***Listen for Information***

In *Listen for Information*, students hear instructions typical of those provided by a classroom teacher. Instructions vary in length from one to three sentences and must be played from the audio CD. The examiner then asks students which of three answer choices restates the instructions they heard. Instructions and answers may contain idioms and different syntactical structures.

***Listen in the Classroom***

*Listen in the Classroom* assesses comprehension of academic language, where students hear two short exchanges typical of classroom discussions. The listening passages, questions, and text answer choices must be played from the audio CD. After

listening, students respond to three questions about what they heard. Each question has three answer choices.

Grade Span	Passage Length
K–2	50–60 words
3–5	60–90 words
6–8	60–100 words
9–12	90–130 words

### ***Listen and Comprehend***

A longer listening passage included in *Listen and Comprehend* assesses comprehension of narratives. Questions ask about main ideas, details, inferences, and idioms. The listening passages, questions, and text answer choices must be played from the audio CD. Students are asked four questions about the passage. Each question has three answer choices.

Grade Span	Passage Length	Genre	Percentage
K–2	150–200 words	Fiction	83%
		Nonfiction	17%
3–5	200–250 words	Fiction	50%
		Nonfiction	50%
6–8	200–250 words	Fiction	33%
		Nonfiction	67%
9–12	225–325 words	Fiction	33%
		Nonfiction	67%

### **The Reading Subtests**

The Reading test is usually administered to a group by a fluent English speaker who reads from the Examiner's Guide. All Reading items are in multiple-choice format. Some items evaluate phonemic awareness as the basis for recognizing words and developing vocabulary. In other items, students read literary and informational grade-appropriate texts to demonstrate sentence-level and discourse-level reading ability as well as inferential skills. The Reading test takes approximately 35–45 minutes to administer and consists of three subtests as follows:

### **Analyze Words**

In *Analyze Words*, students respond to discrete items in a variety of formats addressing four word analysis tasks: identifying rhyming words, applying letter-sound relationships to read English words, applying letter-sound relationships to read English phonemes, and applying knowledge of morphemes and syntax to word meaning. Each question has three answer choices.

### **Read Words**

For Grades K–2, students demonstrate vocabulary by classifying words, selecting written words to match those spoken by the examiner, and matching pictures of objects to their written descriptions. In all other grade levels, students demonstrate vocabulary by choosing synonyms or antonyms of a given word and/or choosing words that correctly complete sentences. Additionally, students in Grades 6–12 are tested on idiomatic expressions. Each question has three answer choices.

### **Read for Understanding**

Higher-level reading skills are evaluated in *Read for Understanding*, in which students respond to passages representing various literary genres (e.g., fiction, nonfiction, and poetry). Questions address three tasks: demonstrating reading comprehension, identifying important literary features of text, and applying learning strategies to interpretation. Students in Kindergarten read along as the examiner reads passages aloud; then students identify one of three picture choices that correspond with the reading passage. Students in Grades 1 and 2 read two additional passages independently. Students in Grades 3–5 read passages without assistance and choose corresponding pictures or text. Students in higher grades read passages without assistance and select from four written answer choices.

Grade Span	Passage Length	Genre	Percentage
K	50–100 words	Fiction	100%
		Nonfiction	0%
1–2	100–150 words	Fiction	100%
		Nonfiction	0%
3–5	175–275 words	Fiction	50%
		Nonfiction	50%
6–8	250–350 words	Fiction (Poetry)	50%
		Nonfiction	50%
9–12	250–450 words	Fiction (Poetry)	50%
		Nonfiction	50%

## **The Writing Subtests**

The Writing test is usually administered to a group by a fluent English speaker who reads from the Examiner's Guide. The test includes both multiple-choice and constructed-response items that assess both receptive and productive domains. In the first section, multiple-choice items engage students to identify appropriate grammar, mechanics, and syntax. In the second section, students respond to prompts in the form of phrases, sentences, and paragraphs.

Responses to constructed-response items are evaluated with performance-based rubrics (on a 0–3 or 0–4 scale depending on the item) that direct the rater's attention to the student's use of English grammar and the appropriate use of discourse. The test takes approximately 35–45 minutes to administer and consists of four subtests, with the exception that students in Grades K–1 do not take *Write in Detail*.

### ***Use Conventions***

Discrete point items in *Use Conventions* assess whether students can identify correct uses of grammar, capitalization, punctuation, and sentence structure. Each item has three answer choices.

### ***Write About***

In *Write About*, students in Grades K–1 write one sentence and students in Grades 2–12 write two sentences to describe a picture. Responses are scored with a 0–3 rubric.

### ***Write Why***

In *Write Why*, students make a choice between two alternatives and write to explain the reason for the choice they make. In Grades K–1, students write one reason; in Grades 2–12, students write two reasons. Responses are scored with a 0–3 rubric.

### ***Write in Detail***

Prompts in *Write in Detail* elicit longer responses. Students in Grade 2 write to describe what is happening in a sequence of four pictures. Students in Grades 3–12 organize their ideas and write paragraphs or essays responding to a written prompt. Responses are scored with a 0–4 rubric. Students in Grades K–1 do not take *Write in Detail*.

## **Administration Training**

The Administration Training Workshops for 2011 were conducted in seven locations in Meeker, Limon, Montrose, Pueblo, Monument, Denver, and Fort Morgan. These locations were selected to cover the state's training needs geographically as well as in terms of district size. A total of 230 participants attended the CELApro workshops. Table 14 shows the breakdown of attendees per workshop location.

Table 14. Number of Attendees at Pre-Administration Training Workshops

Location and Date	Number of Attendees
Meeker 10/26/10	7
Limon 10/29/10	11
Montrose 11/01/10	27
Pueblo 11/05/10	41
Monument 11/09/10	37
Denver 11/10/10	67
Fort Morgan 11/11/10	40
<b>Total attendees</b>	<b>230</b>

### Workshop Setup

The environment of the Pre-Administration Workshop is friendly and facilitates small-group discussion. Participants' seats were not assigned. CELApro was first, followed by the CSAPA Administration Training.

### Training Materials Development

The training materials were developed to reduce complexity, mirror the trainer's script, and ensure clarity in the use of the contents within the Training Folder and Training DVD throughout the training. Following are the details of the purpose of each component.

#### *Training Folder*

The CELApro Administration Training Folder contained a copy of a PowerPoint presentation, a list of acronyms, Speaking Practice Scoring Sheets, and Speaking Rubrics. The purpose of these materials was to allow for easy navigation. Navigation through the training materials is key when training a large number of participants, which in turn facilitates the learning process and helps participants gain the understanding needed to conduct their own trainings.

#### *Training DVD*

Another important part of the training materials is the coordination between the DVD and the training materials in the folder. The Training DVD gives an overview of each subtest for all grade spans: Listening, Speaking, Reading, and Writing. Because the Speaking test is scored by Test Examiners during test administration, the DVD component is critical for training. CTB experts and teachers scored all speaking samples. Participants use Practice Scoring Sheets as part of the scoring calibration exercises.

## Part 5: Scoring

The 2011 CELApro tests were scored and processed by CTB's scoring team using the standardized methods and procedures previously developed for the *LAS Links* program. The CELApro scoring team consists of trained technical specialists who are responsible for coordinating all scoring and reporting activities related to the processing of CELApro test documents. Document preparation, interdepartmental coordination and communication, processing specifications, and problem resolution are performed by a designated Scoring Project Manager from this team. The scoring team works closely with all CTB departments to ensure successful scoring and reporting.

CTB maintains a professional staff of specialized data processing technicians to lead the verification process and ensure the integrity of the student response data at both group and individual levels. Raw scoring and editing of scanned data is performed in a client/server system (WinScore), where a sophisticated system of edits are invoked to review the integrity of each batch scanned and to produce a list of error suspects. While the editors can view data from any document online, the error suspect list concentrates on the most likely problems based on predefined guidelines. This system reduces editing time and provides a high degree of quality control. CTB continues to enhance the capability of editing software to simplify the detection and correction of errors. Online editing screens allow an editor to focus on potential problems and then provide related information. The actual scanned documents are always available to the editor, and the software supports the review and correction of any field in the scanned record. Entry and verification of the necessary corrections are enhanced to ensure that each error is actually corrected. As batches are extracted for scoring, a final edit is performed to ensure that all requirements for scoring are met. This automated final edit flags a batch for further editing if any error is still detected. A batch containing errors cannot be extracted for reporting. This ensures a high level of accuracy of the scored data.

When the editing process is completed, documents are moved to a staging area to be prepared for retention. Bundles are caged, warehoused in a recoverable location, and retained for possible retrieval during the specified retention period. Once this period is over, documents are destroyed according to procedures that ensure security is maintained.

### Handscoring Process

For the CELApro assessments, CTB's imaging handscoring system presents images of scanned test books to trained readers who assign scores for constructed-response items. Scanned images are viewed on high-quality, 19-inch workstation monitors. Images of each student's responses are automatically routed to two or more readers when required, and images of specific subsets of test items are routed to designated groups of readers trained to score these items. CTB is committed to using the finest imaging equipment, software presentation system, data management system, and quality control to provide valid, reliable, cost-efficient scoring.

#### **Readers**

In order to work as a handscoring reader at CTB, one must possess and show evidence of either a BA or BS degree. The evaluator staff is comprised of individuals from many walks of life—from retired or current educators to engineers—all possessing BAs to PhDs.

Many CTB readers also have a great deal of classroom teaching experience. Our reader pool includes editors, published authors, and a number of individuals with advanced degrees. The minimum qualification for all Scoring Center readers is a Bachelor's degree.

### **Team Leaders**

Scoring team leaders are selected on the basis of having demonstrated a high degree of scoring accuracy and consistency, often across multiple subjects and grades. They must also possess good interpersonal and leadership skills in order to be effective when training and counseling readers. The ratio of readers to team leaders is no more than 10 to 1. While it is possible to conduct handscoring with more readers per team leader, it has been CTB's experience that inter-rater reliability and production goals are jeopardized unless a trained leader can frequently monitor all readers.

### **Scoring Supervisors**

Scoring Supervisors are the core group at CTB scoring centers. They direct and organize the assessment process, and train team leaders and readers. Scoring Supervisors have extensive experience as team leaders prior to their qualification and selection. The Scoring Supervisors are subject area experts in the content(s) that they supervise and train.

### **Anchor and Training Papers**

Prior to the actual scoring, the CTB Scoring Center creates training materials. The process includes several presorting steps and subsequent iterative/consensus processes in order to achieve ever-increasing agreement and precision through a kind of "round robin" scoring, followed by discussion and selection. When all papers for a form are selected and assigned status as good anchors, training, qualifying, or check-set papers, they are consolidated into training formats. Scoring Guides (consisting of rubrics, anchors, and annotations) serve as a constant, setting the course for all subsequent training and scoring.

### **Rater Training and Validation**

Validation is a critical task in the assessment training process. It is the final determinant in reader readiness. All readers, including team leaders, must achieve at least 80% exact agreement on the qualifying round following training. Those readers not validating on the first attempt receive further training prior to taking an additional qualifying round. Only those who successfully validate are qualified as readers and allowed to score tests. Team leaders are required to complete two validation rounds with at least 80% exact agreement in each round.

### **Intra-rater Reliability**

Throughout the course of the handscoring process, calibration sets of pre-scored papers (check-sets) are administered daily to the team leaders as well as to the readers to monitor scoring accuracy and to maintain a consistent focus on the established rubric and guidelines. Imaging permits this monitoring without reader knowledge of when a check-set is administered. Readers whose check-set scores fall below the qualifying level are removed from live scoring and are given additional training and another qualifying (validation) round. Readers unable to qualify are dismissed.

The "read-behind" is another valuable intra-rater reliability monitoring technique. On a daily basis, each team leader reads a random selection of each reader's scored items. The scores are compared, and if they agree, the team leader is able to offer feedback, which enhances the

reader's confidence and ability to score quickly and accurately. However, if an individual is straying from the standard established in the training and validation samples, the aberrant scoring is detected, and the team leader is able to offer the guidance necessary to refocus the reader's effort. Team leaders conduct read-behinds more frequently for any reader whose scoring is inconsistent. Thus, any scoring variation is corrected.

### **Inter-rater Reliability**

Intraclass correlation coefficients and weighted Kappa coefficients were calculated to measure reader agreement (Fleiss and Cohen, 1973) for each of the handscored CELApro items,<sup>1, 2</sup> using scores assigned to all item responses that received second reads. The intraclass correlation coefficients ranged from 0.88 to 0.96, with 87 percent of the coefficients greater than or equal to 0.90. The weighted Kappa values also were high<sup>3</sup> for all items, ranging from 0.76 to 0.93, indicating good agreement between the first and second readers. Inter-rater agreement statistics for all of the handscored items are shown in Table 15.

The percentages of discrepant ratings were higher in Kindergarten than in any of the higher grades, ranging from 7 to 10 percent. The percentage of discrepant ratings was 5 percent or less for all items in Grades 1 through 12.

---

<sup>1</sup> If agreement is perfect, both the intraclass correlation coefficient and Kappa will be equal to +1. If agreement is at chance levels, then both coefficients will be equal to zero.

<sup>2</sup> The intraclass correlation does not consider chance agreement between two raters, but the weighted Kappa does take into account chance agreement. Therefore, in general, weighted Kappa will have values equal to or less than the intraclass correlations.

<sup>3</sup> Kappa values between 0.75 and 0.91 represent good agreement beyond chance, and values below 0.40 indicate poor agreement.

Table 15. Inter-Rater Agreement for CELApro Writing Responses

Grade Span	Item	Max Score	% Perfect Agreement	% Adjacent Scores	% Special Codes	% Discrepant (>1 point)	Intraclass Correlation	Wtd Kappa

### **Scoring and Technology Quality Control Procedures**

The Technology and Scoring Departments at CTB both have quality assurance groups specifically charged with reviewing scoring data and reports during all stages of the process. The Technology quality assurance team verifies the accuracy of all reporting programs before they become operational. The Scoring quality assurance team verifies the accuracy of report information during the scoring process. After all data are entered into the scoring system and all reporting programs are completed, a sample of reports are printed and submitted to the Scoring quality assurance group, which reviews the sample reports to verify the accuracy and correct presentation of all data.

Numerous quality assurance checks are in place throughout the scoring process to ensure the accuracy of reports. Prior to delivering any electronic files or hard-copy score reports, all reports are given a final, extensive quality check, known as a “Red Team Review.” Red Teams are comprised of individuals from every CTB department coming together to form an interdisciplinary team. Samples of each type of report are printed from the active scoring system, and the Red Team carefully reviews these samples for accuracy and correct format. Student-level information is compared by hand with student rosters and other documentation. Reports are not sent out until all necessary corrections determined by the Red Team are resolved.

## Part 6: Data Analysis and Results

This section of the technical report contains a description of the 2009 calibration and equating and differential item functioning (DIF) procedures and results, along with details of the 2011 classical item analysis that was conducted for each test. Because the 2011 CELApro tests were identical to those administered in 2009, no new calibration, equating, or DIF analyses were conducted this year. The 2011 CELApro tests were scored using the raw-to-scale score tables that were produced from the results of the 2009 calibration/equating/scaling analyses. This section also includes a subsection describing student performance on the 2011 tests, along with comparisons with the 2010 and 2009 results.

### IRT Item Calibration

Student item responses on each of the CELApro assessments were calibrated in 2009 using the three-parameter logistic (3PL) model to scale the multiple-choice (SR) items, and the two-parameter partial credit (2PPC) model to scale the constructed-response (CR) items. A brief explanation of the models is provided below.

The 3PL model (Lord and Novick, 1968; Lord, 1980) defines a multiple-choice item in terms of three item parameters: (a) item discrimination, (b) item difficulty or location, and (c) probability of a student with very low ability answering the item correctly (i.e., a guessing parameter). In this model, the probability that a student with scale score  $\theta$  will respond correctly to item  $j$  is defined as

$$p_j(\theta) = c_j + \frac{(1 - c_j)}{1 + \exp[-1.7a_j(\theta - b_j)]},$$

where  $a_j$  is the item discrimination,  
 $b_j$  is the item difficulty, and  
 $c_j$  is the probability of a correct response by a very low ability student.

The 2PPC model defines a constructed-response item in terms of item discrimination as well as location parameter for each score point. The 2PPC model is a special case of Bock's (1972) nominal model. Bock's model states that the probability of an examinee with ability  $\theta$  having a score at the  $k$ th level of the  $j$ th item is

$$P_{jk}(\theta) = P(x_j = k - 1 | \theta) = \frac{\exp Z_{jk}}{\sum_{i=1}^{m_j} \exp Z_{ji}}, k = 1, \dots, m_j,$$

where  $m_j$  is the number of score levels, and

$$Z_{jk} = A_{jk} \theta + C_{jk},$$

$$A_{jk} = \alpha_j(k - 1), k = 1, 2, \dots, m_j, \text{ and}$$

$$C_{jk} = -\sum_{i=0}^{k-1} \gamma_{ji}, \text{ where } \gamma_{j0} = 0,$$

where  $A_{jk}$  is the discrimination parameter of the  $k$ th category of item  $j$ ,  $C_{jk}$  is the intercept parameter of the nonlinear response function associated with the  $k$ th category of item  $j$ ,  $\alpha_j$  and  $\gamma_{ji}$  are the parameters to be estimated from the data.

For each item there are  $m_j - 1$  independent  $\gamma_{ji}$  parameters and one  $\alpha_j$  parameter; a total of  $m_j$  independent item parameters is estimated.

All of the CELApro assessments were calibrated in 2009 using the 3PL/2PPC models described above. Separate calibrations were conducted for Listening, Speaking, Reading, Writing, Comprehension, and Oral scales in each grade span.

### **Equating and Scaling**

The calibrated tests were placed on the existing CELApro/LAS *Links* scale in 2009 through a Stocking and Lord (1983) characteristic curve equating procedure. The 2008 operational item parameters for almost all of the test items were used as equating anchors in this procedure.

The 2009 M1 and M2 conversion parameters were computed as follows:

$$M1_{New} = A * M1_{Old}$$

$$M2_{New} = A * M2_{Old} + B$$

where

$M1_{New}$  and  $M2_{New}$  are the new transformation constants calculated to place the 2009 test items onto the existing scale, and

$M1_{Old}$  and  $M2_{Old}$  are the transformation constants from the anchor set.

The  $A$  and  $B$  values are derivatives of the input (initial) and estimated (final) values for the anchor set and are computed as follows:

$$A = \frac{SD_{New}}{SD_{Old}}$$

$$B = (Mean_{New} - \frac{SD_{New}}{SD_{Old}} Mean_{Old})$$

where

$SD_{New}$  is the standard deviation of anchor estimates in scale score metric,

$SD_{Old}$  is the standard deviation of anchor input values in scale score metric,

$Mean_{New}$  is the mean of anchor estimates in scale score metric, and

$Mean_{Old}$  is the mean of anchor input in scale score metric.

This equating procedure was performed in 2009 for each of the grade spans K, 1, 2, 3–5, 6–8, and 9–12. Consequently, the equated results were used to create raw-to-scale score tables for each of the six content areas (Reading, Writing, Listening, Speaking, Oral, and Comprehension). Because the total score is computed as the unweighted mean of the scale scores on Reading, Writing, Listening, and Speaking, no separate calibration, equating, scaling, or scoring table was required for the total score.

The resulting scoring tables for all grade spans, which were used to score the 2011 CELApro, are included in Appendix E.

### **Results of Calibration and Equating**

Tables 1B to 33B and Figures B1 to B66 in Appendix B show the alignment of the original and equated “A” parameters (using the log of A) and the alignment of the corresponding “B” parameters for Listening, Speaking, Reading, and Writing. In these figures, the original parameters are the 2008 CELApro item parameters, and the equated parameters are the 2009 CELApro parameters. Since no equating was performed, the 2011 CELApro parameters are identical to the 2009 item parameters.

Figures C1 to C12 in Appendix C show the CELApro test characteristic curves (TCCs) and the conditional standard errors of measurement (CSEMs) for each grade span and content domain. For a vertically scaled test such as the CELApro/LAS *Links*, we would expect to see a pattern in which the TCCs are arrayed in grade-level sequence from left to right (i.e., with tests increasing in difficulty as grade level increases). The TCCs show this expected pattern.

The correlations between the 2009 equated and input anchor item parameters and  $p$ -values ( $P$ ) are shown in Table 16. For multiple-choice scales, these represent the correlations of the  $A$  and  $B$  parameters. For constructed-response items, the correlations of item parameters represent the alpha and gamma correlations, respectively.

Table 16. Stocking and Lord Parameter Correlations

Grade Span K–2			
	$P$	Discrimination	Location
Speaking	1.00	0.99	1.00
Listening	1.00	0.97	0.93
Reading	1.00	0.98	1.00
Writing	0.99	0.83	0.97
Comprehension	1.00	0.98	1.00
Oral	1.00	0.93	0.95

Table 16. Stocking and Lord Parameter Correlations (continued)

Grade Span 3–5			
	<i>P</i>	Discrimination	Location
Speaking	1.00	0.98	0.97
Listening	1.00	0.98	1.00
Reading	1.00	0.98	0.99
Writing	0.97	0.99	1.00
Comprehension	1.00	0.98	1.00
Oral	1.00	0.96	0.99
Grade Span 6–8			
	<i>P</i>	Discrimination	Location
Speaking	1.00	0.98	0.98
Listening	1.00	0.94	0.98
Reading	1.00	0.98	0.98
Writing	1.00	0.96	0.98
Comprehension	1.00	0.98	0.99
Oral	1.00	0.90	0.98
Grade Span 9–12			
	<i>P</i>	Discrimination	Location
Speaking	1.00	0.98	0.98
Listening	1.00	0.96	0.97
Reading	1.00	0.97	0.99
Writing	1.00	0.97	0.99
Comprehension	1.00	0.97	0.99
Oral	1.00	0.98	0.99

For all contents and grade spans, the  $p$ -value correlations are all greater than 0.95.

For each of the six content domains, Appendix D contains the test characteristic curves for the anchor item input parameters, the equated anchor item estimated parameters, and the equated total test. As shown in these plots, the total test and the anchor test are closely aligned to each other.

### **Item Analysis**

Classical item analysis statistics were computed for the 2011 CELApro administration for each content domain at each grade span. The tables in Appendix A present item-level descriptive statistics for each grade span and content domain. These tables contain the following information: item number, item type, item  $p$ -value, item correlation with the total test score, correlation between each item choice and the total test score, and percent omit. The  $p$ -value for an SR item represents the proportion of students who answered the item correctly. The  $p$ -value

for a CR item represents the mean raw score for the item divided by the maximum possible score for that item.

The point biserial correlation between the item score and the total score on the test was also computed for each of the SR items. For each CR item, the Pearson product-moment correlation between the item score and the total score on the test was computed. For these correlations, the studied item was excluded from the computation of the total score so as not to artificially inflate the correlation.

### **Item Difficulty Statistics ( $p$ -values)**

The 2011 statistics for individual items at each grade span are provided in the item analysis tables in Appendix A. In these tables, item difficulty is expressed in terms of  $p$ -values. For multiple-choice items, the  $p$ -value is the proportion of students answering the item correctly. For constructed-response items, the  $p$ -value is the mean item score expressed as a proportion of the total score points possible on that item (i.e., each raw item score is divided by the maximum possible score on the item). The item-level results, overall, are consistent with the results obtained in 2011.

The  $p$ -values in Appendix A are at or above 0.20 except for five kindergarten Writing items and two kindergarten Speaking items; most are in the desired difficulty range between 0.30 and 0.90. The range of  $p$ -values varies by grade span and content domain. Across grade spans, the  $p$ -values range from 0.09 to 0.98 for Speaking; 0.23 to 0.98 for Listening; 0.20 to 0.99 for Reading; 0.10 to 0.95 for Writing; 0.23 to 0.99 for Comprehension; and 0.09 to 0.98 for Oral. Within grade spans,  $p$ -values range from 0.09 to 0.99 in grade span K–2; from 0.39 to 0.98 in grade span 3–5; from 0.29 to 0.95 in grade span 6–8; and from 0.37 to 0.92 in grade span 9–12.

Average item difficulty for each content area, grade, and grade span is summarized in Table 17. In this table, item difficulty is expressed in terms of  $p$ -values. For multiple-choice items, the  $p$ -value is the proportion of students answering the item correctly. For constructed-response items, the  $p$ -value is the mean item score expressed as a proportion of the total score points possible on that item (i.e., each raw item score is divided by the maximum possible score on the item).

Table 17. Mean *P*-Values by Grade Span and Grade

Grade	Speaking	Listening	Reading	Writing	Comprehension	Oral
Grade Span 1	0.69	0.70	0.69	0.51	0.69	0.70
K	0.55	0.51	0.56	0.29	0.54	0.53
1	0.72	0.73	0.67	0.53	0.68	0.72
2	0.81	0.85	0.82	0.70	0.82	0.83
Grade Span 2	0.82	0.72	0.69	0.77	0.71	0.77
3	0.78	0.66	0.60	0.71	0.63	0.72
4	0.83	0.73	0.70	0.78	0.71	0.78
5	0.86	0.78	0.77	0.82	0.78	0.82
Grade Span 3	0.83	0.79	0.70	0.78	0.74	0.81
6	0.82	0.77	0.66	0.77	0.71	0.79
7	0.83	0.79	0.70	0.78	0.75	0.81
8	0.84	0.81	0.73	0.79	0.78	0.83
Grade Span 4	0.82	0.77	0.64	0.76	0.71	0.79
9	0.80	0.75	0.60	0.75	0.67	0.77
10	0.82	0.77	0.64	0.76	0.70	0.79
11	0.83	0.78	0.66	0.77	0.72	0.80
12	0.83	0.78	0.67	0.76	0.73	0.80

### Item-Total Correlations

An important indicator of item quality is the correlation of scores on that item with scores on the total test. The 2011 item-total correlations (point biserial correlation coefficients for SR items and Pearson product-moment correlations for CR items) are summarized in Table 18. To compute these correlations, the “total” score was defined as the total score on the specific content domain. To avoid artificially inflating the correlation coefficients, the contribution of the item in question was removed from the total when calculating each of the correlations. Thus, performance on each Speaking item was correlated with the total Speaking score minus the score on the item in question, performance on each Listening item was correlated with the total Listening score minus the score on the item in question, and so on for the Reading, Writing, Comprehension, and Oral scales.

Individual item-total correlations for each content area and grade span are provided in the item analysis tables in Appendix A. Across Grades 1–12, item-total correlations for Speaking range from 0.25 to 0.85. Listening items range from 0.21 to 0.54. Reading items range from -0.01 to 0.58, and Writing items range from 0.06 to 0.77. Comprehension item-total correlations range from -0.04 to 0.57, and Oral item-total correlations range from 0.13 to 0.81. Item-total correlations for Kindergarten were generally lower than the other grades, ranging from 0.30 to 0.82 for Speaking, from 0.21 to 0.53 for Listening, from -0.01 to 0.50 for Reading, from 0.06 to 0.62 for Writing, from -0.04 to 0.49 for Comprehension, and from 0.14 to 0.79 for Oral.

The average (mean) item-total correlation coefficients for each content area, grade span, and grade are shown below. The average item-total correlation coefficients ranged from 0.54 to 0.67 for Speaking, from 0.35 to 0.45 for Listening, from 0.35 to 0.45 for Reading, from 0.26 to 0.49 for Writing, from 0.34 to 0.43 for Comprehension, and from 0.39 to 0.50 for Oral.

Table 18. Average Item-Total Correlations by Grade Span and Grade

Grade	Speaking	Listening	Reading	Writing	Comprehension	Oral
Grade Span 1	0.59	0.40	0.37	0.39	0.35	0.44
K	0.62	0.39	0.36	0.26	0.34	0.44
1	0.59	0.41	0.35	0.43	0.34	0.45
2	0.57	0.39	0.39	0.49	0.36	0.43
Grade Span 2	0.55	0.37	0.43	0.48	0.38	0.40
3	0.55	0.35	0.42	0.48	0.36	0.39
4	0.54	0.36	0.44	0.48	0.38	0.40
5	0.56	0.39	0.45	0.48	0.40	0.42
Grade Span 3	0.61	0.40	0.41	0.43	0.39	0.45
6	0.58	0.38	0.39	0.43	0.36	0.42
7	0.61	0.41	0.41	0.44	0.39	0.45
8	0.63	0.42	0.42	0.43	0.41	0.47
Grade Span 4	0.66	0.43	0.41	0.48	0.41	0.49
9	0.66	0.41	0.39	0.48	0.38	0.47
10	0.66	0.43	0.42	0.49	0.41	0.49
11	0.66	0.43	0.43	0.48	0.42	0.49
12	0.67	0.45	0.43	0.48	0.43	0.50

### Item Omit Rates

The item analysis tables in Appendix A also show the rate at which students omitted items. Omit rates are often useful in determining whether testing times are sufficient, particularly if there is a high rate of items omitted at the end of a test section. In cases where speededness is not an issue, high item omit rates may often indicate ambiguity or extreme item difficulty.

Omit rates were generally low for students in Grades 3 through 12. Omit rates for grade spans 6–8 and 9–12 were below 5 percent for all of the items in all content areas. For grade span 3–5, Reading had two items with omit rates of 15.05 percent and 15.68; these same two items in Comprehension had omit rates of 15.01 percent and 15.64 percent. The slight differences in omit rates across the two content domains reflect the fact that omit rates for each domain are based on the responses of students with valid scores on that domain.

Omit rates were generally higher for grade span K–2. Omit rates were between 0.22 and 7.03 percent for all of the Listening items, with five items above 5 percent. For the Reading items,

omit rates were above 5 percent for 11 items in Grades 1–2 and for 18 items administered to Kindergarten students. Speaking K–2 had two items above 5 percent, both of them in Kindergarten. The highest omit rates were for the Kindergarten Writing items, with omit rates ranging from 6.87 percent to 26.82 percent and all items above 5 percent. Only three items in Grade 1 were above 5 percent, and all were below 5 percent for students in Grade 2.

### Differential Item Functioning (DIF) Statistics

In addition to the analyses that were conducted as part of the *LAS Links* development process, Linn-Harnisch (1981) gender DIF analyses were conducted on data from the 2009 CELApro administration. The procedures employed for CELApro DIF analyses apply IRT-based models to analyze the item calibration data. Because no new calibrations have been conducted since 2009, no new DIF analyses were conducted. The DIF analyses and results in this technical report are based on the 2009 item parameters and thus are identical to those that were reported in the last two years.

For the 2009 CELApro analyses, a separate IRT calibration and a separate DIF analysis were conducted for each grade span and content domain (Speaking, Listening, Reading, Writing, Comprehension, and Oral). To calculate DIF for the CELApro assessments, the IRT parameters for each item ( $a_i$ ,  $b_i$ ,  $c_i$ ) and the trait or ability estimate ( $\theta_j$ ) for each examinee were estimated for the three-parameter logistic model:

$$P_{ij} = c_i + \frac{1 - c_i}{1 + \exp[-1.7a_i(\theta_j - b_i)]},$$

where  $P_{ij}$  is the probability that examinee  $j$  will pass item  $i$ . The total population is then divided into two groups by gender, and the members in each group are sorted into ten equal score categories (deciles) based on their location on the scale score ( $\theta_j$ ) scale. The expected proportion correct for each group based on the model prediction is compared to the observed (actual) proportion correct obtained by the group. The proportion of examinees in decile  $g$  who are expected to answer item  $i$  correctly is:

$$P_{ig} = \frac{1}{n_g} \sum_{j \in g} P_{ij},$$

where  $n_g$  is the number of examinees in decile  $g$ . The proportion of examinees expected to answer item  $i$  correctly (over all deciles) for a group (e.g., female) is:

$$P_i = \frac{\sum_{g=1}^{10} n_g P_{ig}}{\sum_{g=1}^{10} n_g}.$$

The corresponding observed proportion correct for examinees in a decile ( $O_{ig}$ ) is defined as the number of examinees in decile  $g$  who answered item  $i$  correctly divided by the total number of examinees in the decile ( $n_g$ ). That is,

$$O_{ig} = \frac{\sum_{j \in g} u_{ij}}{n_g},$$

where  $u_{ij}$  is the dichotomous score for item  $i$  for examinee  $j$ .

The corresponding formula to compute the observed proportion answering each item correctly (over all deciles) for a complete gender or ethnic target group is given by:

$$O_i = \frac{\sum_{g=1}^{10} n_g O_{ig}}{\sum_{g=1}^{10} n_g}.$$

After the values are calculated for these variables, the difference between the observed proportion correct and the expected proportion correct can be computed. The decile group difference ( $D_{ig}$ ) for observed and expected proportion correctly answering item  $i$  in decile  $g$  is:

$$D_{ig} = O_{ig} - P_{ig},$$

and the overall group difference ( $D_i$ ) between observed and expected proportion correct for item  $i$  in the complete group (over all deciles) is:

$$D_i = O_i - P_i.$$

DIF is defined in terms of the decile group and total target subsample differences, the  $D_{i-}$  (sum of the negative group differences) and  $D_{i+}$  (sum of the positive group differences) values, and the corresponding standardized difference ( $Z_i$ ) for the subsample (see Linn and Harnisch 1981, p. 112). Items for which  $|D_i| \geq 0.10$  and  $|Z_i| \geq 2.58$  are flagged as DIF items. If  $D_i$  is positive, the item favors the target subsample. If  $D_i$  is negative, the item favors the standard sample.

These indices are indicators of the degree to which members of a target group perform better or worse than expected on each item, based on the parameter estimates from all subsamples. Differences for decile groups provide an index for each of the ten regions on the scale score ( $\theta$ ) scale. The decile group difference ( $D_{ig}$ ) can be either positive or negative. Use of the decile group differences as well as the overall group difference allows one to detect items that give a large positive difference in one range of  $\theta$  and a large negative difference in another range of  $\theta$ ,

yet have a small overall difference. A generalization of the Linn and Harnisch (1981) procedure was used to measure DIF for constructed-response items.

The results of the 2009 DIF analyses are shown in Table 19. Again, since calibrations did not occur, the results are the same as the last two years. Overall, no items were flagged for DIF against males or females and very few items exhibited differential item functioning by ethnicity. Across all grades and content areas, 24 items (3.02%) were flagged in favor of and 29 items (3.65%) were flagged against American Indian/Alaska Natives, 11 items (1.39%) were flagged in favor of and 13 items (1.64%) were flagged against Asian/Pacific Islanders, 27 items (3.40%) were flagged in favor of and 23 items (2.90%) were flagged against Black examinees, and 2 items (0.25%) were flagged against White examinees. DIF was not performed on Hispanics, because they constitute an overwhelming majority of the respondents.

All items flagged for DIF are carefully reviewed by CTB's content development experts to try to determine whether race, native language, or another characteristic might have caused the DIF. If that review suggests that the DIF statistics are likely to reflect racial bias rather than only meaningful language differences, the items will be replaced in revised future forms whenever suitable replacement items are available.

Table 19. Number of Items Exhibiting Differential Item Functioning

Subject	Grade Span	American Indian/Alaska Native		Asian/Pacific Islander		Black		White	
		For	Against	For	Against	For	Against	For	Against
Speaking	K–2	0	2	1	0	0	0	0	0

### Student Performance on the 2011 CELApro

This section of the report summarizes the performance of students on the 2011 CELApro. Results are presented for the total population and for various subgroups of interest. In addition, results are compared with performance on the 2010 CELApro. To facilitate interpretation of the score distributions provided in this report, the lowest obtainable scale scores (LOSS) and the highest obtainable scale scores (HOSS) on the CELApro are provided in Table 20. These values do not change from year to year.

Table 20. CELApro Lowest and Highest Obtainable Scale Scores

		Speaking	Listening	Reading	Writing	Comp (R+L)	Oral (L+S)	Total
<b>Grade K</b>	LOSS	300	300	240	200	270	280	260
	HOSS	580	560	570	630	570	620	585
<b>Grade 1</b>	LOSS	300	300	240	200	270	280	260
	HOSS	580	560	590	630	590	620	590
<b>Grade 2</b>	LOSS	300	300	240	200	270	280	260
	HOSS	580	560	590	640	590	620	592
<b>Grades 3–5</b>	LOSS	310	310	300	270	320	290	297
	HOSS	635	630	660	680	660	680	651
<b>Grades 6–8</b>	LOSS	325	360	380	300	360	310	341
	HOSS	645	640	690	690	680	700	666
<b>Grades 9–12</b>	LOSS	330	370	390	310	380	320	350
	HOSS	650	650	700	700	700	710	675

Note: LOSS = Lowest Obtainable Scale Score; HOSS = Highest Obtainable Scale Score

Table 21 shows the 2011 total scale score means and standard deviations by grade span, and Table 22 shows the results for each individual grade in 2009, 2010, and 2011.

Table 21. 2011 Total Scale Score Means and Standard Deviations by Grade Span

	N	Mean	SD
Grade Span 1	37290	443.70	54.64
Grade Span 2	29643	528.28	44.11
Grade Span 3	16762	556.91	42.62
Grade Span 4	13514	549.80	45.75

Table 22. 2009, 2010, and 2011 Total Scale Score Means and Standard Deviations by Grade

	2009			2010			2011

7	4660	546.33	44.84	5100	555.04	42.49	5650	558.59	42.683
8	3855	553.09	47.37	4400	561.50	44.74	4608	565.18	44.094
9	3674	534.27	46.64	4056	541.33	44.27	4223	543.03	43.718
10	3176	543.85	47.34	3174	547.03	46.06	3700	550.24	45.872
11	2511	551.40	45.51	2737	554.90	44.45	2884	553.91	45.983
12	1993	550.31	46.68	2311	555.08	46.23	2707	555.39	47.14

The 2011 total scale scores were higher than the 2009 and 2010 scores in all but one grade. The greatest increase in scores occurred in Grades 3 through 8.

The 2011 performance on the six component scales of Speaking, Listening, Reading, Writing, Comprehension, and Oral Proficiency is summarized by grade and grade span in Table 23 and by grade and gender in Table 24. Note that because not all students had valid scores on all four components, the component scale score means may be based upon larger numbers of students than the total scale score means.

Overall, female students tended to score somewhat higher than male students. The greatest gender differences were observed in Writing, Oral, and Speaking. Female students scored higher than male students on the Writing test at all grade levels. Differences in the mean Writing scores were most evident in the elementary school years where the female score advantage ranged from 3 points to more than 17 points, with smaller differences observed at higher grade levels. Male students, on the other hand, tended to score higher than females on the Speaking and Oral tests in Grades 9 through 12. The difference in mean Speaking scores was highest in Grade 12, where the mean score for male students was 12 points higher than the mean for female students. These results are displayed graphically in Figures 1 through 7.

The performance of students tested with and without accommodations is provided in Tables 25 and 26. Because the numbers of students receiving accommodations at each grade level are very small, all accommodations for a content domain are combined in these tables.

Table 25. Total Scale Score Means by Grade and Accommodations

Grade	Total Scale Score					
	Without Accommodations			With Accommodations		
	N	Mean	SD	N	Mean	SD

## Part 7: Reliability and Validity Evidence

Reliability statistics and standard error of measurement were computed using the data from the Spring 2011 CELApro administration, along with information obtained in previous years. Overall, the 2011 CELApro analyses yielded results that are consistent with previous CELApro and *LAS Links* results.

Test validation is an ongoing process of gathering evidence from many sources to evaluate the soundness of the desired score interpretation or use. This evidence is acquired from studies of the content of the test as well as from studies involving scores produced by the test.

Additionally, reliability is a necessary element for validity. A test cannot be valid if it is not also reliable. All test scores contain some measurement error. Test score reliability refers to the degree to which scores on a particular assessment are free of the kinds of measurement errors that introduce variability in a student's scores. Thus, the reliability coefficient quantifies the expected consistency of student performance across multiple test forms or multiple testing occasions.

### Internal Consistency Reliability

Total test reliability measures, such as Cronbach's coefficient alpha (1951) and standard error of measurement, consider the consistency (reliability) of performance over all test questions in a given form; the results of which imply how well the questions measure the content domain and could continue to do so over repeated administrations. Total test reliability coefficients such as coefficient alpha may range from 0.00 to 1.00, where 1.00 refers to a perfectly consistent test.

The internal consistency reliability of the CELApro Speaking, Listening, Reading, Writing, Comprehensions, and Oral scales was evaluated using Cronbach's coefficient alpha, computed with the standard formula

$$C_{\alpha} = \frac{n}{n-1} \left[ 1 - \frac{\sum_{i=1}^n \sigma_i^2}{\sigma_X^2} \right],$$

where

$n$  = the number of items,

$\sigma_i^2$  = the raw item variance, and

$\sigma_X^2$  = the raw score variance for each scale.

Because the CELApro total scale score is a composite (the unweighted mean of the four component scale scores on Speaking, Listening, Reading, and Writing), the internal consistency

reliability of the total score was computed using the following formula for the reliability of battery composites:

$$\rho_{ZZ'} = 1 - \frac{\sum_{j=1}^k \sigma^2_{x_j} (1 - \rho_{x_j x'_j})}{k^2 \sigma_Z^2},$$

where

$k$  = the number of component scales (for CELApro,  $k=4$ ),

$\rho_{x_j x'_j}$  = reliability of each of the component scales,

$\sigma^2_{x_j}$  = scale score variance of each of the component scales, and

$\sigma^2_Z$  = variance of the total (mean) scale score.

The internal consistency reliability coefficients for the 2011 CELApro tests are shown in Table 27. Achievement tests are typically considered to be of sound reliability when their reliability coefficients are in the range of 0.80 and above. All of the reliability coefficients for Speaking, Reading, Writing, Comprehension, and Oral meet or exceed this criterion. However, the reliability coefficients for the Listening scale are at or below 0.80 for every grade except grade 12 and every grade span except grade span 1. This is consistent with the results observed in prior years, and may be a consequence of the very small number of items and score points on the Listening test. Because the Listening scores account for one fourth of the total composite, their lower reliability serves to lower the total score reliability as well. In spite of this, the total score reliability coefficients exceed 0.90 for every grade and grade span.

Table 27. Internal Consistency Reliability Coefficients by Grade Span and Grade

	Speaking	Listening	Reading	Writing	Comprehension	Oral	Total Score
Grade Span 1	0.93	0.85	0.88	0.82	0.90	0.94	0.95
K	0.92	0.75	0.82	0.80	0.83	0.92	0.91

6	0.90	0.71	0.83	0.82	0.86	0.90	0.93
7	0.92	0.75	0.85	0.83	0.88	0.92	0.94
8	0.93	0.78	0.86	0.83	0.89	0.92	0.94
Grade Span 4	0.94	0.79	0.86	0.87	0.90	0.93	0.95
9	0.94	0.76	0.83	0.87	0.88	0.93	0.95
10	0.94	0.79	0.86	0.87	0.90	0.93	0.95
11	0.93	0.79	0.86	0.87	0.90	0.93	0.95
12	0.94	0.81	0.87	0.88	0.91	0.93	0.95

### **Standard Errors of Measurement**

Another measure of reliability is a direct estimate of the degree of measurement error in students' reported scores on a test. This second measure of reliability is called the standard error of measurement (SEM) and represents the number of score points about which a given score is expected to vary. The SEM of the CELApro Speaking, Listening, Reading, Writing, Comprehension, and Oral scales was computed with the standard formula

$$SEM = SD * \sqrt{1 - \alpha} ,$$

where

*SD* = standard deviation of scale score

*alpha* = reliability coefficient

Because the SEM is a function of the test reliability and the standard deviation, there is no prescribed minimum value for this statistic. Rather, the SEM is useful primarily in evaluating the range over which individual scores may be expected to vary. We can expect that two thirds of the obtained scores will be within one SEM of the individuals' true scores.

The SEMs for the Spring 2011 CELApro assessments are shown in Table 28.

Table 28. Standard Errors of Measurement by Grade Span and Grade

	Speaking	Listening	Reading	Writing	Comprehension	Oral	Total Score

12	15.68	27.43	17.10	18.67	16.30	15.26	10.12

### **Validity Evidence**

The purpose of test validation is to validate interpretations of the test scores for particular purposes or uses. Test validation is an ongoing process, beginning at initial conceptualization and continuing throughout the lifetime of an assessment. Every aspect of an assessment provides evidence in support of its validity (or evidence to the contrary), including design, content requirements, item development, and psychometric quality.

The *LAS Links* and CELApro tests were designed and developed to provide English language proficiency scores that are valid for most types of educational decision making. The primary inferences from the test results include measurement of the proficiency of individual students relative to an international sample and relative program effectiveness based on the results of groups of students. Progress can be tracked over years and grades. The results can be used in a norm- and/or criterion-referenced manner to analyze the strengths and weaknesses of a

student's growth in each skill area, to plan for further instruction and curriculum development, and to report progress to parents. The results can also be used as one factor in making administrative decisions about program effectiveness, class grouping, needs assessment, and placement in ELD programs.

The *LAS Links* program was developed in accordance with the criteria for test development, administration, and use described in the Standards for Educational and Psychological Testing (1999) adopted by the American Educational Research Association (AERA), the American Psychological Association (APA), and the National Council on Measurement in Education (NCME).

### **Content Validity**

Content-related validity for language proficiency tests is evidenced by a correspondence between test content and instructional content. To ensure such correspondence, developers conducted a comprehensive curriculum review and met with educational experts to determine common educational goals and the knowledge and skills emphasized in curricula across the country. This information guided all phases of the design and development of the *LAS Links* suite of assessments.

As described in Part 1 of this report and summarized previously in Table 2, a study of the alignment of the CELApro assessments to the Colorado standards was also conducted, and a high level of agreement has been found. This alignment is expected to become even stronger as the CELApro assessments are further customized in future years.

### **Construct Validity**

Construct validity—what test scores mean and what kinds of inferences they support—is the central concept underlying the *LAS Links* test validation process. Evidence for construct validity is comprehensive and integrates evidence from both content- and criterion-related validity. To establish meaningfulness, *LAS Links* should correlate highly with independent measures of achievement and cognitive ability.

Convergent and discriminate validity evidence can also be established through a pattern of high correlations among scales that purport to measure domains that are known to be closely related and lower correlations among scales that purport to measure dissimilar domains. This kind of pattern provides evidence that the scales are actually measuring the constructs that they purport to measure. While we have no external measures available at present to correlate with the CELApro scale scores, the pattern of correlations within CELApro provides preliminary validity evidence. The 2011 intercorrelations among the CELApro scales for each grade and grade span are shown in Tables 29 through 32.

	Oral						0.91

Overall, the pattern of correlations among the four content domains of Speaking, Listening, Reading, and Writing is similar to the pattern observed in the 2010 data and is consistent with theoretical expectations for the CELApro language constructs. For example, the correlations support the distinction between the receptive language skills (Listening and Reading) and the productive language skills (Speaking and Writing). At almost all grade levels, the component exhibiting the highest correlation with the Listening scale is the Reading scale. The relationship between the productive skills of Speaking and Writing is less clear.

Consistent with last year, the highest single correlation coefficient among the four domains at every grade except kindergarten is the correlation between the two orthographic domains of Reading and Writing.

## **Part 8. Special Studies**

No special studies were conducted in the 2010–2011 administration.

Colorado English Language Acquisition Assessment Program  
2011 Technical Report

Appendix F: List of Colorado Standards Directly Assessed  
by the CELApro

Developed and published under contract with Colorado Department of Education by CTB/McGraw-Hill LLC, a subsidiary of The McGraw-Hill Companies, Inc., 20 Ryan Ranch Road, Monterey, California 93940-5703. Copyright © 2011 by the Colorado Department of Education. Only State of Colorado educators and citizens may copy, download and/or print this document. Any other use or reproduction of this document, in whole or in part, requires written permission of the Colorado Department of Education and the publisher.

The following tables show the standards in each domain that are directly assessed in the CELApro.

<b>Grades K–2 Listening</b>	
<b>a. Beginning Level</b>	
1. Follow clear one-step directions in 1:1 situations.	
2. Respond nonverbally or in one- or two-word phrases to greetings and requests in 1:1 situations.	
4. Demonstrate comprehension of stories and information by responding nonverbally, e.g., listening, pointing, moving, matching, drawing, gesturing, or with simple word responses.	
5. Understand key words and familiar phrases.	
<b>b. Intermediate Level</b>	
1. Follow clear two- or three-step directions in 1:1 situations.	
2. Respond to familiar social language.	
3. Respond to simple and some complex questions with words or phrases, e.g., either/or, who/how.	
4. Comprehend stories, key concepts of content area information, and oral presentations with contextual support, e.g., graphic organizers, posters, diagrams, charts.	
5. Identify characters and sequence in a story.	
<b>c. Advanced Level</b>	
1. Follow multiple-step directions.	
3. Demonstrate comprehension of read-aloud stories, content area information, and oral presentations with contextual support by paraphrasing, explaining, expressing opinions, etc.	
4. Respond to complex and content-related questions about newly learned information, e.g., compare and contrast.	
5. Identify main idea and details in a story.	
6. Demonstrate understanding of some idiomatic expressions by responding appropriately to such expressions as “hit the road.”	

<b>Grades K–2 Speaking</b>	
<b>a. Beginning Level</b>	
1. Use gestures, single words, and simple phrases in greetings, routine conversations, and to communicate needs.	
2. Use both social and academic learned vocabulary in context.	
5. Retell simple stories and personal experiences using key words and phrases.	
6. Respond to simple questions related to immediate context with single words, e.g., yes/no, either/or, basic personal information.	
<b>b. Intermediate Level</b>	
1. Imitate appropriate language in formal and informal settings.	
2. Use vocabulary learned in content area lessons.	
3. Use simple sentences to express needs and ideas about familiar topics in social and academic contexts.	
4. Retell familiar stories and experiences using simple sentences.	
6. Contribute to classroom and small group discussions by responding to and asking simple questions.	

<b>c. Advanced Level</b>
1. Communicate information and feelings clearly in conversations.
2. Contribute to classroom discussions by asking/answering questions, giving opinions, disagreeing, and sharing experiences.
3. Retell, narrate, and paraphrase stories with descriptive detail including characters and setting.
4. Use both formal and informal language, e.g., interviewing, persuasive speech, with attention to grammar, vocabulary, intonation, and pronunciation.
5. Use expanded and descriptive vocabulary related to content areas.

<b>Grades K–2 Reading</b>	
<b>a. Beginning Level</b>	
3. Demonstrate understanding of sound-symbol relationships appropriate to grade level.	
4. Use illustrations and background knowledge to create meaning from read-aloud stories.	
8. Recognize English phonemes that students are already able to hear and produce.	
9. Recognize patterns in writing, e.g., rhyming, word families.	
10. Recognize the difference between letters and numbers.	
<b>b. Intermediate Level</b>	
1. Read patterned language and familiar stories at appropriate grade level.	
2. Have command of sound-symbol relationship and basic rules of word formation.	
5. Use illustrations and background knowledge in combination with more complex vocabulary to create meaning and predict text.	
6. Read and understand the meaning of words, phrases, and short sentences with familiar vocabulary and text independently.	
7. Respond to simple stories read aloud using simple sentences.	
9. Demonstrate an understanding of prediction, main idea, and sequence using key words and simple sentences.	
11. Comprehend key concepts of grade-appropriate content area text supported within an instructional unit.	
<b>c. Advanced Level</b>	
2. Have command of sound-symbol relationship and basic rules of word formation in phrases, simple sentences, and simple texts.	
4. Demonstrate ability to comprehend text and use new information to respond appropriately.	
5. Respond appropriately to questions about main idea and story elements.	
6. Answer questions about inferences, cause and effect, problem solving.	

<b>Grades K–2 Writing</b>	
<b>a. Beginning Level</b>	
7. Label familiar objects and pictures, including key parts of content area objects.	
9. Write pattern sentences with assistance.	
<b>b. Intermediate Level</b>	
1. Demonstrate knowledge of directionality, space between words, and upper-/lower-case letters.	
2. Supply missing words in familiar or framed patterns.	
6. Write simple sentences with spelling approximations and accurate end punctuation.	
9. Write a simple narrative with beginning, middle, and end including sequencing words, e.g., next, then with guidance.	
10. Write a simple descriptive sentence based on observation and learned vocabulary related to content areas.	
<b>c. Advanced Level</b>	
1. Write stories about a series of pictures sequentially and with details.	
3. Write a variety of sentences, e.g., interrogative, declarative, and exclamatory.	
4. Write simple sentences and short paragraphs to demonstrate content area learning.	
5. Write short narrative stories that include the elements of setting, characters, and events.	
8. Communicate in writing using a variety of genres, e.g., expository, descriptive, letters, poetry, autobiography.	
9. Use conventional spelling, capitalization, punctuation, grammar, and sentence structure.	

<b>Grades 3–5 Listening</b>	
<b>a. Beginning level</b>	
1. Follow clear one-step directions in 1:1 situations.	
2. Respond non-verbally or in one- or two-word phrases to greetings and requests in 1:1 situations.	
4. Demonstrate comprehension of stories, information, and academic content by responding non-verbally, e.g., listening, pointing, moving, matching, drawing, and gesturing.	
5. Understand key words and familiar phrases.	
7. Listen for specific purposes and main ideas.	
<b>b. Intermediate Level</b>	
1. Follow clear multiple-step directions in 1:1 situations.	
2. Respond to familiar social language.	
3. Respond to simple and some complex questions with words and phrases, e.g., open-ended, either/or, who/how.	
4. Comprehend stories, key concepts of content area information, and oral presentations with contextual support, e.g., graphic organizers, posters, diagrams, charts.	
5. Identify characters, setting, and sequence in a story.	
<b>c. Advanced Level</b>	
1. Follow multiple-step directions.	
3. Demonstrate comprehension of read-aloud stories, content area information, and oral presentations with contextual support by paraphrasing, explaining, expressing opinions, etc.	
4. Respond to complex and content-related questions about newly learned information, e.g., compare and contrast, describe.	
5. Identify main idea and details in a story.	
6. Demonstrate understanding of some idiomatic expressions by responding appropriately to such expressions as “hit the road.”	

<b>Grades 3–5 Speaking</b>	
<b>a. Beginning Level</b>	
1. Use gestures, single words, and simple phrases in greetings, routine conversations, and to communicate needs.	
2. Use both social and academic learned vocabulary in context.	
5. Retell predictable and familiar stories using single words and phrases.	
6. Respond to simple questions related to immediate context with single words, e.g., yes/no, open-ended, either/or, basic personal information.	
<b>b. Intermediate Level</b>	
2. Use key content and descriptive vocabulary.	
3. Communicate ideas using simple sentences in social and academic settings.	
4. Retell familiar stories and identify main idea and some details using phrases and sentences.	
6. Contribute to classroom and small group discussions by responding to and asking simple questions.	
<b>c. Advanced Level</b>	
1. Communicate information, observations, and ideas, and express feelings clearly in conversations.	
3. Contribute to classroom discussions by asking/answering questions, giving opinions, disagreeing.	
4. Retell, narrate, and paraphrase stories with descriptive detail including characters, setting, plot, summary, and analysis.	
5. Use both formal and informal language, e.g., interviewing, persuasive speech, with attention to grammar, vocabulary, intonation, and pronunciation.	
7. Use technical, expanded, and descriptive vocabulary related to content areas.	

<b>Grades 3–5 Reading</b>	
<b>a. Beginning Level</b>	
1. Demonstrate understanding of sound-symbol relationship in context and in own reading.	
3. Recognize simple words, familiar phrases, and simple sentences.	
5. Recognize sight words and content area vocabulary that have been taught in context.	
8. Answer in one- or two-word phrases literal questions about text.	
<b>b. Intermediate Level</b>	
1. Have command of sound-symbol relationship and basic rules of word formation in own reading.	
2. Understand the meaning of words, phrases, and short sentences with familiar vocabulary in text.	
4. Recognize some common root words, prefixes, and suffixes when they are attached to known vocabulary.	
5. Identify basic story elements and make predictions in stories and information using simple sentences.	
6. Use a variety of reading strategies to interpret the meaning of unfamiliar words and gain information from text, print, and media resources, e.g., illustrations, decoding, word attack skills, background knowledge.	
9. Comprehend key concepts of grade-appropriate content area text supported within an instructional unit.	

<b>c. Advanced Level</b>
1. Apply reading strategies to understand more complex text and unfamiliar words, e.g., decoding, previewing, skimming/scanning, problem solving, word attack skills, prior knowledge.
2. Comprehend grade-appropriate content area text with support.
3. Make inferences about information and ideas with reference to features in text.
4. Respond to stories/text by analyzing, summarizing, giving opinions, evaluation, justifying, examining, and explaining.
5. Recognize common root words, prefixes, and suffixes.

<b>Grades 3–5 Writing</b>	
<b>a. Beginning Level</b>	
3. Label familiar objects and pictures including key parts of content area objects.	
6. Write pattern sentences with assistance.	
7. Write about personal experiences with support and using illustrations and simple phrases.	
8. Use familiar words presented and emphasized in content, e.g., literature, math, and science area lessons.	
<b>b. Intermediate Level</b>	
1. Respond to visual or written prompts using phrases and simple sentences.	
3. Use standard word order and conventional spelling, punctuation, and capitalization in basic sentence patterns with support.	
6. Write short descriptive and expository paragraphs for academic communication.	
8. Use transition words to organize writing, e.g., first, after that, in the beginning, later.	
10. Write to express preferences and opinions.	
<b>c. Advanced Level</b>	
1. Use print for social communication, e.g., notes, invitations, e-mail, diary entries.	
2. Respond appropriately to a prompt using narrative, expository, or persuasive writing.	
3. Use a variety of sentence patterns with appropriate tenses and conventions.	
7. Write descriptions and comparisons, including the use of figurative language.	
8. Use conventional spelling, capitalization, punctuation, grammar, and sentence structure.	

<b>Grades 6–8 Listening</b>	
<b>a. Beginning Level</b>	
1. Follow clear one-step directions in 1:1 and group situations.	
2. Respond non-verbally or in one- or two-word phrases to greetings and requests in 1:1 and group situations.	
4. Demonstrate comprehension of stories, information, and academic content by responding non-verbally, e.g., listening, pointing, moving, matching, drawing, and gesturing.	
5. Understand key words, phrases, and simple sentences.	
7. Listen for specific purposes, main ideas, and details.	

<b>b. Intermediate Level</b>
1. Follow clear multiple-step directions in group situations.
2. Respond to social and familiar academic language.
3. Respond to simple and some complex questions with words and phrases, e.g., open-ended, either/or, who/how.
4. Comprehend stories, key concepts of content area information, and oral presentations with contextual support, e.g., graphic organizers, posters, diagrams, charts.
5. Identify story elements, e.g., characters, setting, plot.
<b>c. Advanced Level</b>
1. Follow complex directions involving multiple options and choices.
3. Analyze and evaluate conversations and orally presented stories and content.
4. Comprehend stories and content area concepts at or near grade level with contextual support, e.g., graphic organizers, posters, diagrams, and charts.
5. Respond to complex and content-related questions about newly learned information, e.g., inference, comparison, summarization, point of view, disagreeing.

<b>Grades 6–8 Speaking</b>
<b>a. Beginning Level</b>
1. Use gestures, single words, and simple phrases during basic conversations and to communicate needs in social and academic settings.
2. Use both social and academic learned vocabulary in context.
5. Retell predictable and familiar stories using single words and phrases.
6. Respond to simple questions related to immediate context with single words, phrases, e.g., yes/no, either/or, basic personal information.
7. Ask questions to obtain and clarify information using single words and phrases.
<b>b. Intermediate Level</b>
2. Use key content and descriptive vocabulary.
3. Communicate ideas about a wide range of topics, both social and academic, using simple sentences.
4. Restate information and identify main idea and some details using sentences, e.g., oral presentations, texts, media, etc.
6. Contribute to classroom and small group discussions by asking and responding to questions to obtain, clarify, and extend information.
<b>c. Advanced Level</b>
1. Communicate information, observations, and ideas, and express feelings clearly in conversations.
2. Engage in collaborative activities through a variety of student groupings to gather, share, express, and interpret opinions, organize and present information.
7. Use technical, expanded, and descriptive vocabulary related to content areas.

<b>Grades 6–8 Reading</b>	
<b>a. Beginning Level</b>	
1. Demonstrate knowledge of sound-symbol relationship in context and in own reading and writing.	
4. Identify and use beginning reading strategies to make text comprehensible and meaningful, e.g., illustrations, graphic organizers, text features, pacing, word attack skills, picture/bilingual dictionaries.	
5. Identify main ideas, details, and sequence of events from modified/visually-supported texts based upon purpose for reading, using non-verbal or one- or two-word phrases.	
<b>b. Intermediate Level</b>	
1. Recognize, decode, and pronounce new vocabulary in context.	
2. Comprehend key concepts of grade-appropriate content area text with support.	
4. Identify and use reading strategies to gain information and make text comprehensible and meaningful, e.g., predicting, questioning, summarizing, self-correcting, evaluating, compare/contrast, print, and media resources.	
5. Identify elements of a story, main ideas, details, and sequence of events from modified/visually-supported texts based upon purpose for reading using simple sentences and paragraphs.	
6. Use grade-appropriate syntax/contextual clues to gain meaning from new vocabulary.	
<b>c. Advanced Level</b>	
1. Use a variety of reading strategies to understand more complex text and unfamiliar words from print and media resources, e.g., paraphrasing, skimming/scanning, problem solving, syntax, summarizing, compare/contrast, and cause/effect.	
2. Comprehend grade-appropriate content area text with support.	
3. Identify elements of a story, main ideas, details, and sequence of events of near or at grade-level text.	
5. Use multiple resources at grade level to draw inferences, conclusions, and generalizations, e.g., glossaries, indexes, graphs, illustrations, headings, subheadings, key vocabulary.	
6. Respond to near or at grade-level text by defending, justifying, supporting inferences, and evaluating.	
9. Demonstrate understanding of some language subtleties, e.g., common idioms, dialect, humor, figurative language.	

<b>Grades 6–8 Writing</b>	
<b>a. Beginning Level</b>	
2. Label objects and illustrations presented in content area lessons.	
3. Write simple sentences and phrases using a model.	
5. Write about personal and group experiences using illustrations, words, and phrases.	
<b>b. Intermediate Level</b>	
1. Use basic sentence patterns with conventional spelling, capitalization, and punctuation.	
7. Write paragraphs and short expository compositions on content area topics, e.g., compare/contrast, cause/effect, problem/solution that include an introductory statement, supporting details and conclusion.	
9. Communicate in writing using a variety of genres, e.g., narrative, content area reports, letter writing, poetry, autobiography.	

<b>c. Advanced Level</b>
1. Respond appropriately to a prompt using narrative, expository, or persuasive writing.
5. Use complex sentence structures with grade-appropriate vocabulary, appropriate syntax, and conventions, e.g., spelling, capitalization, punctuation.
10. Write clear and accurate descriptions and comparisons, including the use of figurative language.

<b>Grades 9–12 Listening</b>	
<b>a. Beginning Level</b>	
1. Follow clear multiple-step directions in 1:1 and group situations.	
2. Respond non-verbally or in one- or two-word phrases to greetings and requests in 1:1 and group situations.	
4. Demonstrate comprehension of stories, information, and academic content by responding non-verbally, e.g., listening, pointing, moving, matching, drawing, and gesturing.	
5. Understand key words, phrases, and simple sentences.	
7. Listen for specific purposes, main ideas, and details.	
<b>b. Intermediate Level</b>	
1. Follow specific multiple-step directions in group situations.	
2. Respond to social and familiar academic language.	
3. Respond to simple and some complex questions with words and phrases, e.g., open-ended, either/or, who/how.	
4. Comprehend stories, key concepts of content area information, and oral presentations with contextual support, e.g., graphic organizers, posters, diagrams, charts.	
5. Identify story elements, e.g., characters, setting, plot, and theme.	
<b>c. Advanced Level</b>	
1. Follow complex directions involving multiple options and choices.	
3. Analyze and evaluate conversations and orally presented stories and content.	
4. Comprehend stories and content area concepts at or grade level with contextual support, e.g., graphic organizers, posters, diagrams, and charts, by analyzing, evaluating, examining, etc.	
5. Respond to increasingly complex and content-related questions about newly learned information, e.g., inference, comparison, summarization, point of view, disagreeing.	
6. Demonstrate understanding of most oral language subtleties, e.g., figurative language, humor, idioms, sarcasm, riddles, slang.	

<b>Grades 9–12 Speaking</b>	
<b>a. Beginning Level</b>	
1. Use gestures, single words, and simple phrases during basic conversations and to communicate needs in social and academic settings.	
2. Use both social and academic learned vocabulary in context.	
5. Restate information from social and academic settings using single words and phrases.	
6. Respond to simple questions related to immediate context with single words, phrases, e.g., yes/no, open-ended, either/or, basic personal information.	

<b>b. Intermediate Level</b>
2. Use key content and descriptive vocabulary.
3. Communicate ideas about a wide range of topics, both social and academic, using simple sentences.
4. Restate information and identify main idea and some details using sentences, e.g., oral presentations, texts, media, etc.
6. Contribute to classroom and small group discussions by asking and responding to questions to obtain, clarify, and extend information.
<b>c. Advanced Level</b>
1. Communicate information, observations, and ideas, and express feelings clearly in conversations.
2. Engage in collaborative activities through a variety of student groupings to gather, share, express, and interpret opinions, discuss, reflect on, organize, analyze, synthesize, and present information.
7. Use technical, expanded, and descriptive vocabulary related to content areas.

<b>Grades 9–12 Reading</b>
<b>a. Beginning Level</b>
1. Recognize, decode, and pronounce high frequency words.
3. Identify and use reading strategies to make text comprehensible and meaningful, e.g., illustrations, graphic organizers, text features, pacing, word attack skills, resource materials.
5. Identify elements of story, main ideas, details, and sequence of events from modified/visually-supported texts using non-verbal or one- or two- word phrases.
<b>b. Intermediate Level</b>
1. Recognize, decode, and pronounce high frequency vocabulary with ease and comprehension.
2. Comprehend key concepts of grade-appropriate content area text with support.
4. Identify and use reading strategies to gain information and make text comprehensible and meaningful, e.g., previewing/reviewing, skimming, and identifying related topics and main ideas, print and media resources.
6. Identify elements of story, main ideas, details, and sequence of events by using context, based upon purpose for reading.
7. Understand and analyze text for literal and implied meaning.
<b>c. Advanced Level</b>
1. Use a variety of reading strategies to comprehend at or near grade-level text and extend personal knowledge from print and media resources, e.g., paraphrasing, previewing/reviewing, skimming/scanning, summarizing, evaluating, compare/contrast, cause/effect, examining.
2. Comprehend grade-appropriate content area text with support.
4. Support interpretation of text for literal and implied meaning with reference to features in written text, e.g., vocabulary, facts, sequence, relevance of details, and bias of author.
6. Demonstrate understanding of most language subtleties, e.g., common idioms, dialect, humor, figurative language.

<b>Grades 9–12 Writing</b>
<b>a. Beginning Level</b>
1. Write simple sentences and phrases using a model.
4. Write a short personal narrative using simple sentences.

<b>b. Intermediate Level</b>
3. Use varied sentence patterns with conventional spelling, capitalization, and punctuation.
5. Write, with modeling and support, paragraphs and short expository compositions on content area topics, e.g., compare/contrast, cause/effect, problem/solution that include an introductory statement, supporting details, and a conclusion.
9. Communicate in writing using a variety of genres, e.g., research papers, business letters, editorials, poetry, and autobiography.
<b>c. Advanced Level</b>
3. Respond appropriately to open-ended prompt in narrative, expository, or persuasive writing.
6. Use conventional spelling, capitalization, punctuation, grammar, and syntax.
